Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Shock Tunnel Measurements of Hypervelocity Blunted Cone Drag J94-371
Vorticity in an Inviscid Fluid at Hypersonic Speeds J94-370
Numerical Model of Boundary-Layer Control Using Air-Jet Generated Vortices J94-361
Implementing the Relaxation Damping of Air into the Navier-Stokes Equation J94-347
Two-Equation Turbulence Model for Unsteady Separated Flows Around Airfoils J94-345
Laplace Interaction Law for the Computation of Viscous Airfoil Flow in Low- and High-Speed Aerodynamics J94-328
Effects of Expansions on a Supersonic Boundary Layer: Surface Pressure Measurements J94-327
Mean Flow Study of Two-Dimensional Subsonic Turbulent Boundary Layers J94-325
Aerodynamic Shape Optimization Using Preconditioned Conjugate Gradient Methods J94-324
Interaction of a Streamwise Vortex with a Thin Plate: A Source of Turbulent Buffeting J94-302
Parallel Implicit Unstructured Grid Euler Solvers J94-297
Turbulent Flow Measurements with a Triple-Split Hot-Film Probe J94-288
Performance of the κ–ε Model in Computation of Asymmetric Turbulent Near Wakes J94-286
Numerical Investigation of Separated Nozzle Flows J94-273
Direct Calculations of Waves in Fluid Flows Using High-Order Compact Difference Scheme J94-264
High-Resolution Navier-Stokes Computation of Vortical Flow over a Supersonic Delta Wing J94-258
Suppression of Dynamic-Stall Vortices over Pitching Airfoils by Leading-Edge Suction J94-247
Onset of Vortex Breakdown Above a Pitching Delta Wing J94-237
Lift Analysis of a Variable Camber Foil Using the Discrete Vortex-Blob Method J94-224
Rotating Kirchhoff Method for Three-Dimensional Transonic Blade-Vortex Interaction Hover Noise J94-202
Aerodynamic Investigation with Focusing Schlieren in a Cryogenic Wind Tunnel J94-183
Numerical Investigation of Cylinder Wake Flow with a Rear Stagnation Jet J94-162
Precision Requirement for Potential-Based Panel Methods J94-159
Explicit Kutta Condition for an Unsteady Two-Dimensional Constant Potential Panel Method J94-154
Symmetry Breaking in Vortical Flows over Cones—Theory and Numerical Experiments J94-145
Reattachment Studies of an Oscillating Airfoil Dynamic Stall Flowfield J94-144
New Multigrid Approach for Three-Dimensional Unstructured, Adaptive Grids J94-137
General Strong Conservation Formulation of Navier-Stokes Equations in Nonorthogonal Curvilinear Coordinates J94-134
Effects of Time Scales on Lift of Airfoils in an Unsteady Stream J94-112
Airfoil Pressure Measurements During Oblique Shock-Wave/Vortex Interaction in a Mach 3 Stream J94-110
Multipoint Inverse Design of an Infinite Cascade of Airfoils J94-109
Dynamic Pitch-Up of a Delta Wing J94-102
Effects of Periodic Spanwise Blowing on Delta-Wing Configuration Characteristics J94-101
Numerical Model for Circulation-Control Flows J94-100
Two-Dimensional Unsteady Leading-Edge Separation on a Pitching Airfoil J94-097
High Angle-of-Attack Airfoil Performance Improvement by Internal Acoustic Excitation J94-091
Interferometric Investigations of Compressible Dynamic Stall over a Transiently Pitching Airfoil J94-082
Reduction of Blade-Vortex Interaction Noise Through Porous Leading Edge J94-068
Effect of Reynolds Number and Turbulence on Airfoil Aerodynamics at –90-Degree Incidence J94-064
Vortex Breakdown over Delta Wings in Unsteady Freestream J94-060
Evaluation of Navier-Stokes Solutions Using the Integrated Effect of Numerical Dissipation J94-041
Parametric Computational Study of Isolated Blade-Vortex Interaction Noise J94-034
Unsteady Flow Phenomena over Delta Wings at High Angle of Attack J94-033
Simple Numerical Criterion for Vortex Breakdown J94-015
Improving the Efficiency of Aerodynamic Shape Optimization J94-009
Unsteady Panel Method for Flows with Multiple Bodies Moving Along Various Paths J94-008
Generic Parallel Adaptive-Grid Navier-Stokes Algorithm J94-007
Head-On Parallel Blade-Vortex Interaction J94-002
Influence of Wing Shapes on Surface Pressure Fluctuations at Wing-Body Junctions J94-001

Aeroelasticity and Aeroservoelasticity

Eigenanalysis of Unsteady Flows About Airfoils, Cascades, and Wings J94-362
Efficient Sensitivity Analysis for Rotary-Wing Aeromechanical Problems J94-350
Finite Element Time Domain—Modal Formulation for Nonlinear Flutter of Composite Panels J94-305
Bilinear Formulation Applied to the Response and Stability of Helicopter Rotor Blade J94-304
Interaction of a Streamwise Vortex with a Thin Plate: A Source of Turbulent Buffeting J94-302

Aerospace Plane

Linear Disturbances in Hypersonic, Chemically Reacting Shock Layers J94-206
Thermomechanical Coupling Effects at High Flight Speeds J94-058

Configuration Design

Aerodynamic Shape Optimization Using Preconditioned Conjugate Gradient Methods J94-324
Sensitivity Derivatives for Three-Dimensional Supersonic Euler Code Using Incremental Iterative Strategy J94-193
Transition Correlations in Three-Dimensional Boundary Layers J94-132

Fuels and Fuel Systems

Atomization Experiments in a Coaxial Coflowing Mach 1.5 Flow J94-246

Noise

Active Control of Wake/Blade-Row Interaction Noise J94-293
Asymptotic Theory of Supersonic Propeller Noise J94-035
Parametric Computational Study of Isolated Blade-Vortex Interaction Noise J94-034
Active Control of Fan Noise from a Turbofan Engine J94-003

Propeller and Rotor Systems

Adaptive Finite Element Method for Turbulent Flow near a Propeller J94-329
Aeroelastic Response of Composite Rotor Blades Considering Transverse Shear and Structural Damping J94-116
Multipoint Inverse Design of an Infinite Cascade of Airfoils J94-109
Asymptotic Theory of Supersonic Propeller Noise J94-035

Rotorcraft

Efficient Sensitivity Analysis for Rotary-Wing Aeromechanical Problems J94-350
Bilinear Formulation Applied to the Response and Stability of Helicopter Rotor Blade J94-304
Static Shape Control for Adaptive Wings J94-281
Demonstration of an Elastically Coupled Twist Control Concept for Tilt Rotor Blade Application J94-234
Aeroelastic Stability of Hingeless Rotor Blade in Hover Using Large Deflection Theory J94-217
Artificial Neural Networks for Predicting Nonlinear Dynamic Helicopter Loads J94-153
Dynamic-Stall and Structural-Modeling Effects on Helicopter Blade Stability with Experimental Correlation J94-115

Safety

Computational Methods for Efficient Structural Reliability and Reliability Sensitivity Analysis J94-256

Simulation

Numerical Model of Boundary-Layer Control Using Air-Jet Generated Vortices J94-361
Static Shape Control for Adaptive Wings J94-281

Direct Calculations of Waves in Fluid Flows Using High-Order Compact Difference Scheme J94-264
Boundary Variational Formulation of a Frictionless Contact Problem for Composite Finite Bodies J94-050

Structural Design (Including Loads)

Vibration of Clamped Right Triangular Thin Plates: Accurate Simplified Solutions J94-376
Continuum Approach for Second-Order Shape Design Sensitivity of Three-Dimensional Elastic Solids J94-312
Optimal Design of Frame Structures Using Multivariate Spline Approximation J94-311
Effect of Isotropy of Actuation Strains for a Plate with a Hole J94-262
Equivalent Plate Structural Modeling for Wing Shape Optimization Including Transverse Shear J94-187
Buckling Analysis of Laminated Cylindrical Shells with Arbitrary Noncircular Cross Section J94-090
Boundary Variational Formulation of a Frictionless Contact Problem for Composite Finite Bodies J94-050

Structural Materials

Probability Approach for Prediction of Corrosion and Corrosion Fatigue Life J94-309
Effect of Isotropy of Actuation Strains for a Plate with a Hole J94-262
Interlaminar Tension Strength of Graphite/Epoxy Composite Laminates J94-218
Effect of Damage on the Impact Response of Composite Laminates J94-197
Buckling Analysis of Laminated Cylindrical Shells with Arbitrary Noncircular Cross Section J94-090

Testing, Flight and Ground

Turbulent Flow Measurements with a Triple-Split Hot-Film Probe J94-288
Boundary-Layer Transition Detection with Infrared Imaging Emphasizing Cryogenic Applications J94-278
Measurement of Surface Shear Stress Vectors Using Liquid Crystal Coatings J94-238
Aerodynamic Investigation with Focusing Schlieren in a Cryogenic Wind Tunnel J94-183
Surface Interference in Rayleigh Scattering Measurements near Forebodies J94-163
Time and Flow-Direction Responses of Shear-Stress-Sensitive Liquid Crystal Coatings J94-099

Vibration

Vibration of Clamped Right Triangular Thin Plates: Accurate Simplified Solutions J94-376
Coupled FEM-BEM Approach for Mean Flow Effects on Vibro-Acoustic Behavior of Planar Structures J94-352
Damage Detection in Framed Structures J94-165
Vibration Analysis of Mistuned Bladed-Disk Assemblies—Inverse Approach J94-121
Automatic Choice of Measurement Locations for Dynamic Testing J94-055
Second-Order Structural Identification Procedure via State-Space-Based System Identification J94-054

Energy

Laser Integration/Systems

Hydrogen Fluoride Chemical Laser Multiple-Pass Amplifier Performance J94-017

Rotating Machinery

Staggered Finite Volume Scheme for Solving Cascade Flow with a k-ω Turbulence Model J94-240
Stability of Magnetic Bearing-Rotor Systems and the Effects of Gravity and Damping J94-220
Three-Dimensional Closure of the Passage-Averaged Vorticity-Potential Formulation J94-155

Fluid Dynamics

Aeroacoustics

Enhanced Mixing of Multiple Supersonic Rectangular Jets by Synchronized Screech J94-372
Parallel Processing for Implicit Solutions of the Navier-Stokes Equations J94-368
Coupled FEM-BEM Approach for Mean Flow Effects on Vibro-Acoustic Behavior of Planar Structures J94-352
Mach Wave Emission from a High-Temperature Supersonic Jet J94-351
Rotor-Rotor Interaction for Counter-Rotating Fans, Part 1: Three-Dimensional Flowfield Measurements J94-334
Entrainment and Acoustic Variations in a Round Jet from Introduced Streamwise Vorticity J94-313
Unsteady Supersonic Cavity Flow Simulations Using Coupled k-ε and Navier-Stokes Equations J94-301
Active Control of Wake/Blade-Row Interaction Noise J94-293
Significance of Shock Structure on Supersonic Jet Mixing Noise of Axisymmetric Nozzles J94-284
Turbulent Mixing Noise from Supersonic Jets J94-265
Direct Calculations of Waves in Fluid Flows Using High-Order Compact Difference Scheme J94-264
Control of High-Speed Impinging-Jet Resonance J94-239
Control-Nonlinear-Nonstationary Structural Response and Radiation near a Supersonic Jet J94-204
Computing Unsteady Shock Waves for Aeroacoustic Applications J94-203
Rotating Kirchhoff Method for Three-Dimensional Transonic Blade-Vortex Interaction Hover Noise J94-202
Disturbance Generation in Supersonic Jets Under Acoustic Excitation J94-201
Vortex Cutting by a Blade, Part 1: General Theory and a Simple Solution J94-170
Sound Radiation and Caustic Formation from a Point Source in a Wall Shear Layer J94-169
Numerical Simulation of Vortex-Wedge Interaction J94-168
Screech Tones from Free and Ducted Supersonic Jets J94-131
Structure of Supersonic Jet Flow and Its Radiated Sound J94-129
Reduction of Blade-Vortex Interaction Noise Through Porous Leading Edge J94-068
Design Optimization Methods for Rectangular Panels with Minimal Sound Radiation J94-067
Mixing Enhancement by and Noise Characteristics of Streamwise Vortices in an Air Jet J94-066
Stochastic Approach to Noise Modeling for Free Turbulent Flows J94-065
Asymptotic Theory of Supersonic Propeller Noise J94-035
Parametric Computational Study of Isolated Blade-Vortex Interaction Noise J94-034
Long Distance Propagation Model and Its Application to Aircraft En Route Noise Prediction J94-026
Heat Release Effects on the Instability of Parallel Shear Layers J94-025
Active Control of Fan Noise from a Turbofan Engine J94-003
Head-On Parallel Blade-Vortex Interaction J94-002
Influence of Wing Shapes on Surface Pressure Fluctuations at Wing-Body Junctions J94-001

Boundary Layers and Heat Transfer—Laminar

Diverging Solutions of the Boundary-Layer Equations near a Plane of Symmetry J94-285
Solution of Keller's Box Equations for Direct and Inverse Boundary-Layer Problems J94-229
Adaptive Finite Element Method for Thermal Flow Problems J94-105
Three-Dimensional Laminar Boundary Layer in a Constant Pressure Diverging Flow—Blasius Equivalent J94-027

Boundary Layers and Heat Transfer—Turbulent

Computation of Oscillating Airfoil Flows with One- and Two-Equation Turbulence Models J94-353
Two-Equation Turbulence Model for Unsteady Separated Flows Around Airfoils J94-345
Effects of Expansions on a Supersonic Boundary Layer: Surface Pressure Measurements J94-327
Logarithmic Laws for Compressible Turbulent Boundary Layers J94-326
Mean Flow Study of Two-Dimensional Subsonic Turbulent Boundary Layers J94-325
Assessment of Second-Order Closure Models in Turbulent Shear Flows J94-315
Van Driest Transformation and Compressible Wall-Bounded Flows J94-314
Diverging Solutions of the Boundary-Layer Equations near a Plane of Symmetry J94-285
Hypersonic, Turbulent Viscous Interaction past an Expansion Corner J94-270
Turbulent Drag Reduction Mechanism Above a Riblet Surface J94-266
Interactive Control of Turbulent Boundary Layers: A Futuristic Overview J94-263
Two-Equation Eddy-Viscosity Turbulence Models for Engineering Applications J94-241
Staggered Finite Volume Scheme for Solving Cascade Flow with a k-ω Turbulence Model J94-240
Response of Hot-Element Wall Shear Stress Gages in Unsteady Turbulent Flows J94-216
Navier-Stokes Simulations of Slender Axisymmetric Shapes in Supersonic, Turbulent Flow J94-214
Supersonic and Hypersonic Shock/Boundary-Layer Interaction Database J94-205

Laser Interferometer Skin-Friction Measurements of Crossing-Shock-Wave/Turbulent-Boundary-Layer Interactions J94-182
Fluctuating Wall Pressures near Separation in Highly Swept Turbulent Interactions J94-171
Asymptotic Behavior of Solutions of the Renormalization Group K-ε Turbulence Model J94-158
Asymptotic Probabability Density Function of a Scalar J94-156
Turbulence Models for Compressible Boundary Layers J94-104
Heat Transfer Measurements and Computations of Swept-Shock-Wave/Boundary-Layer Interactions J94-103
Flowfield Measurements in Supersonic Film Cooling Including the Effect of Shock-Wave Interaction J94-081
Sphere Wakes at Moderate Reynolds Numbers in a Turbulent Environment J94-075
Effect of Reynolds Number and Turbulence on Airfoil Aerodynamics at –90-Degree Incidence J94-064
Performances of Riblets in the Supersonic Regime J94-059
Simulation of Transition with a Two-Equation Turbulence Model J94-036
Estimate of Convective Velocity in a Supersonic Turbulent Mixing Layer J94-028
Flow Alteration and Drag Reduction by Riblets in a Turbulent Boundary Layer J94-004
Influence of Wing Shapes on Surface Pressure Fluctuations at Wing-Body Junctions J94-001
Comment on "Skin Friction and Velocity Profile Family for CompressibleTurbulent Boundary Layers" J93-252
Reply by the Authors to F. Motallebi J93-252

Boundary-Layer Stability and Transition

Analytical Study of the Neutral Stability of a Model Hypersonic Boundary Layer J94-354
Computation of Oscillating Airfoil Flows with One- and Two-Equation Turbulence Models J94-353
Droplet Dispersion and Ejection Processes in Two-Phase Boundary Layer J94-333
Boundary-Layer Transition Detection with Infrared Imaging Emphasizing Cryogenic Applications J94-278
Interactive Control of Turbulent Boundary Layers: A Futuristic Overview J94-263
Lift Analysis of a Variable Camber Foil Using the Discrete Vortex-Blob Method J94-224
Linear Disturbances in Hypersonic, Chemically Reacting Shock Layers J94-206
Low-Dimensional Description of the Dynamics in Separated Flow past Thick Airfoils J94-180
Sound Radiation and Caustic Formation from a Point Source in a Wall Shear Layer J94-169
Transition Correlations in Three-Dimensional Boundary Layers J94-132
Transition Correlations in Three-Dimensional Boundary Layers J94-132
Optimization of Viscoelastic Compliant Walls for Transition Delay J94-037
Simulation of Transition with a Two-Equation *Turbulence Model* J94-036
Heat Release Effects on the Instability of Parallel Shear Layers J94-025

Computational Fluid Dynamics

Effects of Spatial Order of Accuracy on the Computation of Vortical Flowfields J94-369
Comparison of Standard and Matrix-Free Implementations of Several Newton-Krylov Solvers J94-358
Hypersonic Flow Past Open Cavities J94-357
Data-Parallel Lower-Upper Relaxation Method for Reacting Flows J94-356
Quality Estimates and Stretched Meshes Based on Delaunay Triangulations J94-355
Implementing the Relaxation Damping of Air into the Navier-Stokes Equation J94-347
Adaptive Finite Element Method for Turbulent Flow near a Propeller J94-329
Laplace Interaction Law for the Computation of Viscous Airfoil Flow in Low- and High-Speed Aerodynamics J94-328
Logarithmic Laws for Compressible Turbulent Boundary Layers J94-326
Aerodynamic Shape Optimization Using Preconditioned Conjugate Gradient Methods J94-324
Fuzzy Controller and Neuron Models of Harten's Second-Order Total Variation Diminishing Scheme J94-319
Numerical Implementation of a Modified Liou-Steffen Upwind Scheme J94-318
Zones in Coflowing Planar Inviscid Supersonic Twin Streams J94-316
Van Driest Transformation and Compressible Wall-Bounded Flows J94-314
Unsteady Supersonic Cavity Flow Simulations Using Coupled k-ε and Navier-Stokes Equations J94-301
Particle Dispersion in a Transitional Axisymmetric Jet: A Numerical Simulation J94-300
Parallel Implicit Unstructured Grid Euler Solvers J94-297
Comparison of Two Methods for Solving Three-Dimensional Unsteady Compressible Viscous Flows J94-296
Comparison of Two Formulations for High-Order Accurate Essentially Nonoscillatory Schemes J94-295
Projection Method for Viscous Incompressible Flow on Quadrilateral Grids J94-294
Active Control of Wake/Blade-Row Interaction Noise J94-293
Time-Accurate Local Time Stepping Method Based on Flux Updating J94-287
Performance of the κ–ε Model in Computation of Asymmetric Turbulent Near Wakes J94-286
Validation Procedure for the Analysis of Shock-Wave/Boundary-Layer Interaction Problems J94-271
Implicit Multiblock Euler and Navier-Stokes *Calculations* J94-269
Unified Parallel Algorithm for Grid Adaptation on a Multiple-Instruction Multiple-Data Architecture J94-268
Comparison of Coordinate-Invariant and Coordinate-Aligned Upwinding for the Euler Equations J94-267
Comparative Study of Higher Order Turbulence *Models for Compressible Separated Flows* J94-261
Unstructured Viscous Grid Generation by the Advancing-Layers Method J94-259
High-Resolution Navier-Stokes Computation of *Vortical Flow over a Supersonic Delta Wing* J94-258
Three-Dimensional Unstructured Adaptive Multigrid Scheme for the Euler Equations J94-244
Finite Element Method for Incompressible Viscous Flows with Adaptive Hybrid Grids J94-243
Application of Essentially Nonoscillatory Schemes to Unsteady Hypersonic Shock-Shock Interference Heating Problems J94-242
Two-Equation Eddy-Viscosity Turbulence Models for Engineering Applications J94-241
Staggered Finite Volume Scheme for Solving Cascade Flow with a k-ω Turbulence Model J94-240
Adaptive Computations of Flow Around a Delta Wing with Vortex Breakdown J94-232
Approximations for Weak and Strong Oblique Shock Wave Angles J94-231
Derivation of a Modified Hybrid Approximation J94-230
Solution of Keller's Box Equations for Direct and Inverse Boundary-Layer Problems J94-229
Impingement of Supersonic Jets on an Axisymmetric Deflector J94-228
Model for Compressible Turbulence in Hypersonic Wall Boundary and High-Speed Mixing Layers J94-226
Lift Analysis of a Variable Camber Foil Using the Discrete Vortex-Blob Method J94-224
Navier-Stokes Simulations of Slender Axisymmetric Shapes in Supersonic, Turbulent Flow J94-214
Vortex Cutting by a Blade, Part II: Computations of Vortex Response J94-212
Modeling Three-Dimensional Gas-Turbine Combustor Model Flow Using Second-Moment Closure J94-210
Behavior of the Johnson-King Turbulence Model in Axisymmetric Supersonic Flows J94-207
Computing Unsteady Shock Waves for Aeroacoustic Applications J94-203
Relationship Between Stokes Number and Intrinsic Frequencies in Particle-Laden Flows J94-195
Sensitivity Derivatives for Three-Dimensional Supersonic Euler Code Using Incremental Iterative Strategy J94-193
Two-Phase Flows: Second-Order Schemes and Boundary Conditions J94-179
Edge-Based Finite Element Scheme for the Euler Equations J94-175
Fast Multigrid Method for Solving Incompressible Hydrodynamic Problems with Free Surfaces J94-174
Three-Dimensional Adaptive Grid-Embedding Euler Technique J94-173
Time Integration Algorithms for the Two-Dimensional Euler Equations on Unstructured Meshes J94-172
Numerical Simulation of Turbulent Cylinder Juncture Flowfields J94-166
Numerical Investigation of Cylinder Wake Flow with a Rear Stagnation Jet J94-162
Practical Formulation of a Positively Conservative Scheme J94-161
Comparison of Finite Element and Finite Volume Methods for Incompressible Viscous Flows J94-160
Precision Requirement for Potential-Based Panel Methods J94-159
Three-Dimensional Closure of the Passage-Averaged Vorticity-Potential Formulation J94-155
Explicit Kutta Condition for an Unsteady Two-Dimensional Constant Potential Panel Method J94-154
*Structure of Local Pressure-Driven Three-Di*mensional Transient Boundary-Layer Separation J94-143
Unique Determination of Solutions to the Burnett Equations J94-141
Numerical Study of Transient Flow Phenomena in Shock Tunnels J94-139
New Multigrid Approach for Three-Dimensional Unstructured, Adaptive Grids J94-137
Multigrid Convergence of an Implicit Symmetric *Relaxation Scheme* J94-136

Grid Adaptation Using Chimera Composite Overlapping Meshes J94-135
General Strong Conservation Formulation of Navier-Stokes Equations in Nonorthogonal Curvilinear Coordinates J94-134
Modeling Scramjet Combustor Flowfields with a Grid Adaptation Scheme J94-133
Computational/Experimental Investigation of Staged Injection into a Mach 2 Flow J94-130
Automated Adaptive Time-Discontinuous Finite Element Method for Unsteady Compressible Airfoil Aerodynamics J94-106
Adaptive Finite Element Method for Thermal Flow Problems J94-105
Turbulence Models for Compressible Boundary Layers J94-104
Numerical Simulation of Shock-Box Interaction Using an Adaptive Finite Element Scheme J94-098
Using the Liou-Steffen Algorithm for the Euler and Navier-Stokes Equations J94-092
General Solution Procedure for Flows in Local Chemical Equilibrium J94-073
Nonreflective Boundary Conditions for High-Order Methods J94-072
Compressible Navier-Stokes Computations of Multielement Airfoil Flows Using Multiblock Grids J94-071
Parallel Dynamic Load-Balancing Algorithm for Three-Dimensional Adaptive Unstructured Grids J94-070
Design and Implementation of a Parallel Unstructured Euler Solver Using Software Primitives J94-069
Stochastic Approach to Noise Modeling for Free Turbulent Flows J94-065
Effect of Reynolds Number and Turbulence on Airfoil Aerodynamics at –90-Degree Incidence J94-064
Reactive and Viscous Flow in Hypersonic Nozzles J94-046
Experimental, Analytical, and Computational Methods Applied to Hypersonic Compression Ramp Flows J94-042
Evaluation of Navier-Stokes Solutions Using the Integrated Effect of Numerical Dissipation J94-041
Surface Boundary Conditions for the Numerical Solution of the Euler Equations J94-040
Efficient Cell-Vertex Upwind Scheme for the Two-Dimensional Euler Equations J94-039
Upwind Method for Simulation of Viscous Flow on Adaptively Refined Meshes J94-038
Simulation of Transition with a Two-Equation Turbulence Model J94-036
Numerical Study of Unsteady Supersonic Compression Ramp Flows J94-030
Quasi-One-Dimensional Modeling of a Free-Piston Shock Tunnel J94-018
Simple Numerical Criterion for Vortex Breakdown J94-015
Improving the Efficiency of Aerodynamic Shape Optimization J94-009
Unsteady Panel Method for Flows with Multiple Bodies Moving Along Various Paths J94-008
Generic Parallel Adaptive-Grid Navier-Stokes Algorithm J94-007
Validity of Linearized Unsteady Euler Equations with Shock Capturing J94-006
Effect of Artificial Viscosity on Three-Dimensional Flow Solutions J94-005

Hydrodynamics

Asymmetric Vortex Pair in the Wake of a Circular Cylinder J94-299
Projection Method for Viscous Incompressible Flow on Quadrilateral Grids J94-294
Influence of Impingement Edge Geometry on Cavity Flow Oscillations J94-260
Fast Multigrid Method for Solving Incompressible Hydrodynamic Problems with Free Surfaces J94-174
Explicit Kutta Condition for an Unsteady Two-Dimensional Constant Potential Panel Method J94-154
Interaction of a Streamwise Vortex with a Free Surface J94-083

Hypersonic Flow

Shock Tunnel Measurements of Hypervelocity Blunted Cone Drag J94-371
Vorticity in an Inviscid Fluid at Hypersonic Speeds J94-370
Hypersonic Flow Past Open Cavities J94-357
Analytical Study of the Neutral Stability of a Model Hypersonic Boundary Layer J94-354
Time-of-Flight Mass Spectrometer for Impulse Facilities J94-348
Numerical Implementation of a Modified Liou-Steffen Upwind Scheme J94-318
Van Driest Transformation and Compressible Wall-Bounded Flows J94-314
Computation of Axisymmetric and Ionized Hypersonic Flows Using Particle and Continuum Methods J94-272
Validation Procedure for the Analysis of Shock-Wave/Boundary-Layer Interaction Problems J94-271
Hypersonic, Turbulent Viscous Interaction past an Expansion Corner J94-270
Application of Essentially Nonoscillatory Schemes to Unsteady Hypersonic Shock-Shock Interference Heating Problems J94-242
Approximations for Weak and Strong Oblique Shock Wave Angles J94-231
Model for Compressible Turbulence in Hypersonic Wall Boundary and High-Speed Mixing Layers J94-226
Navier-Stokes Simulations of Slender Axisymmetric Shapes in Supersonic, Turbulent Flow J94-214
Linear Disturbances in Hypersonic, Chemically Reacting Shock Layers J94-206
Supersonic and Hypersonic Shock/Boundary-Layer Interaction Database J94-205
Chemical Recombination in an Expansion Tube J94-192
Unique Determination of Solutions to the Burnett Equations J94-141
Numerical Study of Transient Flow Phenomena in Shock Tunnels J94-139
Monte Carlo Computation of Nonequilibrium Flow in a Hypersonic Iodine Wind Tunnel J94-138
Turbulence Models for Compressible Boundary Layers J94-104
Reactive and Viscous Flow in Hypersonic Nozzles J94-046
Numerical Investigation of Mixing Augmentation Behind Oblique Shock Waves J94-043
Experimental, Analytical, and Computational Methods Applied to Hypersonic Compression Ramp Flows J94-042
Quasi-One-Dimensional Modeling of a Free-Piston Shock Tunnel J94-018

Inlet, Nozzle, Diffusor, and Channel Flows

Active Boundary-Layer Control in Diffusers J94-360
Effect of Grid Aspect Ratio on Convergence J94-359
Prediction of Turbulent Flow Through a Transition Duct Using a Second-Moment Closure J94-330
Zones in Coflowing Planar Inviscid Supersonic Twin Streams J94-316
Entrainment and Acoustic Variations in a Round Jet from Introduced Streamwise Vorticity J94-313
Diverging Solutions of the Boundary-Layer Equations near a Plane of Symmetry J94-285
Numerical Investigation of Separated Nozzle Flows J94-273
Turbulent Drag Reduction Mechanism Above a Riblet Surface J94-266
Design and Operation of a Supersonic Annular Flow Facility J94-225
Swirl Control in an S-Duct at High Angle of Attack J94-194
Boundary Conditions for Unsteady Supersonic Inlet Analyses J94-177
Computation of Separated Duct Flows Using the Boundary-Layer Equations J94-176
Time Integration Algorithms for the Two-Dimensional Euler Equations on Unstructured Meshes J94-172
Numerical Study of Transient Flow Phenomena in Shock Tunnels J94-139
Numerical Investigation of Mixing Augmentation Behind Oblique Shock Waves J94-043
Improving the Efficiency of Aerodynamic Shape Optimization J94-009
Comment on "Extension of the λ Formulation to Imperfect Gas Flows" J92-438
Reply by the Author to G. Christy and G. Emanuel J92-438

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Enhanced Mixing of Multiple Supersonic Rectangular Jets by Synchronized Screech J94-372
Numerical Model of Boundary-Layer Control Using Air-Jet Generated Vortices J94-361
Mach Wave Emission from a High-Temperature Supersonic Jet J94-351
Experimental Investigation of High-Speed Twin Jets J94-346
Simulation of Turbulent Fluctuations J94-332
Main Features of Overexpanded Triple Jets J94-331
Laplace Interaction Law for the Computation of Viscous Airfoil Flow in Low- and High-Speed Aerodynamics J94-328
Assessment of Second-Order Closure Models in Turbulent Shear Flows J94-315
Entrainment and Acoustic Variations in a Round Jet from Introduced Streamwise Vorticity J94-313
Asymmetric Vortex Pair in the Wake of a Circular Cylinder J94-299
Role of Splitter Plates in Modifying Cylinder Wake Flows J94-298
Performance of the κ–ε Model in Computation of Asymmetric Turbulent Near Wakes J94-286
Visualized Flow Patterns of Double Concentric Jets at Low Annulus Velocities J94-277
Experimental and Numerical Study of Swept Ramp Injection into a Supersonic Flowfield J94-276
Vortical and Turbulent Structure of a Lobed Mixer Free Shear Layer J94-275
Velocity Measurements in Turbulent Bluff-Body Stabilized Flows J94-274
Turbulent Mixing Noise from Supersonic Jets J94-265

Velocity Field Imaging in Supersonic Reacting Flows near Atmospheric Pressure J94-251
Measurements of Kelvin-Helmholtz Instabilities in a Supersonic Shear Layer J94-245
Control of High-Speed Impinging-Jet Resonance J94-239
Numerical Computations of Supersonic Base Flow with Special Emphasis on Turbulence Modeling J94-233
Impingement of Supersonic Jets on an Axisymmetric Deflector J94-228
Penetration and Mixing of Gas Jets in Supersonic Cross Flow J94-227
Model for Compressible Turbulence in Hypersonic Wall Boundary and High-Speed Mixing Layers J94-226
Separation Prevention as an Indirect Problem Based on the Triple-Deck Theory J94-211
Direct Simulation Monte Carlo and Navier-Stokes Simulations of Blunt Body Wake Flows J94-208
Control-Nonlinear-Nonstationary Structural Response and Radiation near a Supersonic Jet J94-204
Relationship Between Stokes Number and Intrinsic Frequencies in Particle-Laden Flows J94-195
Role of Mixing in the Chemical Oxygen-Iodine Laser Reactions J94-181
Effect of Initial Conditions on Vortices in a Turbulent Near Wake J94-178
Computation of Separated Duct Flows Using the Boundary-Layer Equations J94-176
Coherent Structure in a Combusting Jet in Crossflow J94-167
Numerical Investigation of Cylinder Wake Flow with a Rear Stagnation Jet J94-162
Asymptotic Probability Density Function of a Scalar J94-156
Structure of Supersonic Jet Flow and Its Radiated Sound J94-129
Effects of Trailing-Edge Jet Entrainment on Delta Wing Vortices J94-113
Compressible Turbulence Measurements in a High-Speed High-Reynolds-Number Mixing Layer J94-107
Effects of Periodic Spanwise Blowing on Delta-Wing Configuration Characteristics J94-101
Numerical Model for Circulation-Control Flows J94-100
Calculation of Matched Pressure Properties of Low-Altitude Rocket Plumes J94-094
Active Open-Loop Control of Particle Dispersion in Round Jets J94-078
Development of a Large-Aspect-Ratio Rectangular Turbulent Free Jet J94-077
Near Field of a Coaxial Jet With and Without Axial Excitation J94-076
Sphere Wakes at Moderate Reynolds Numbers in a Turbulent Environment J94-075
Quantitative Investigation of Compressible Mixing: Staged Transverse Injection into Mach 2 Flow J94-074
Mixing Enhancement by and Noise Characteristics of Streamwise Vortices in an Air Jet J94-066
Infrared Imaging of Large-Amplitude, Low-Frequency Disturbances on a Planar Jet J94-044
Numerical Investigation of Mixing Augmentation Behind Oblique Shock Waves J94-043
Experimental, Analytical, and Computational Methods Applied to Hypersonic Compression Ramp Flows J94-042
Concentration Measurements in a Transverse Jet by Planar Laser-Induced Fluorescence of Acetone J94-031
Vortex Distortion During Vortex-Surface Interaction in a Mach 3 Stream J94-016
Supersonic Base Flow Experiments in the Near Wake of a Cylindrical Afterbody J94-010

Multiphase Flows

Droplet Dispersion and Ejection Processes in Two-Phase Boundary Layer J94-333
Particle Dispersion in a Transitional Axisymmetric Jet: A Numerical Simulation J94-300
Atomization Experiments in a Coaxial Coflowing Mach 1.5 Flow J94-246
Geometry of Thin Liquid Sheet Flows J94-196
Relationship Between Stokes Number and Intrinsic Frequencies in Particle-Laden Flows J94-195
Two-Phase Flows: Second-Order Schemes and Boundary Conditions J94-179
Analytic Solutions for Dusty Shock Waves J94-140
Characterization of Droplet/Vapor/Vortex Interactions in a Two-Dimensional Shear Layer J94-126
Measurements of Droplet Dispersion in Heated and Unheated Turbulent Jets J94-123
Active Open-Loop Control of Particle Dispersion in Round Jets J94-078

Plasmadynamics and MHD

Vortex Breakdown over Delta Wings in Unsteady Freestream J94-060
Nonlocal Thermodynamic Equilibrium in Laser-Sustained Plasmas J94-045

Rarefied Flows

Computation of Axisymmetric and Ionized Hypersonic Flows Using Particle and Continuum Methods J94-272
Direct Simulation Monte Carlo and Navier-Stokes Simulations of Blunt Body Wake Flows J94-208
Unique Determination of Solutions to the Burnett Equations J94-141
Parameters of Nocilla Gas/Surface Interaction Model from Measured Accommodation Coefficients J94-108
Ionization of NO at High Temperature J94-079

Reacting Flows and Combustion

Data-Parallel Lower-Upper Relaxation Method for Reacting Flows J94-356
Implementing the Relaxation Damping of Air into the Navier-Stokes Equation J94-347
Comparison of NO and OH Planar Fluorescence Temperature Measurements in SCRAMJET Model Flowfields J94-292
Planar Air Density Measurements near Model Surfaces by Ultraviolet Rayleigh/Raman Scattering J94-215
Modeling Three-Dimensional Gas-Turbine Combustor Model Flow Using Second-Moment Closure J94-210
Probability Density Function Approach for Compressible Turbulent Reacting Flows J94-209
Chemical Recombination in an Expansion Tube J94-192
Role of Mixing in the Chemical Oxygen-Iodine Laser Reactions J94-181
Coherent Structure in a Combusting Jet in Crossflow J94-167
Asymptotic Probability Density Function of a Scalar J94-156
Experimental Observations of the Effect of Gravity Changes on Smoldering Combustion J94-142
Modeling Scramjet Combustor Flowfields with a Grid Adaptation Scheme J94-133
Numerical Simulation of Acoustic Waves in a Combustor Using Total-Variation-Diminishing Schemes J94-124
Stationary Premixed Flames in Spherical and Cylindrical Geometries J94-080
General Solution Procedure for Flows in Local Chemical Equilibrium J94-073
Analysis of Thermal Ignition in the Supersonic Mixing Layer J94-047
Reactive and Viscous Flow in Hypersonic Nozzles J94-046
Quasiglobal Reaction Model for Ethylene Combustion J94-029
Heat Release Effects on the Instability of Parallel Shear Layers J94-025
Atomic Oxygen Generators for Surface Studies in Low Earth Orbit J94-012
Numerical Investigations of Transitional H_2/N_2 Jet Diffusion Flames J94-011

Separated Flows

Effect of Non-Poisson Samples on Turbulence Spectra from Laser Velocimetry J94-373
Effects of Spatial Order of Accuracy on the Computation of Vortical Flowfields J94-369
Active Boundary-Layer Control in Diffusers J94-360
Two-Equation Turbulence Model for Unsteady Separated Flows Around Airfoils J94-345
Suppression of Vortex Asymmetry and Side Force on a Circular Cone J94-317
Role of Splitter Plates in Modifying Cylinder Wake Flows J94-298
Visualized Flow Patterns of Double Concentric Jets at Low Annulus Velocities J94-277
Numerical Investigation of Separated Nozzle Flows J94-273
Interactive Control of Turbulent Boundary Layers: A Futuristic Overview J94-263
Comparative Study of Higher Order Turbulence Models for Compressible Separated Flows J94-261
Influence of Impingement Edge Geometry on Cavity Flow Oscillations J94-260
Suppression of Dynamic-Stall Vortices over Pitching Airfoils by Leading-Edge Suction J94-247
Numerical Computations of Supersonic Base Flow with Special Emphasis on Turbulence Modeling J94-233
Elliptic Tip Effects on the Vortex Wake of an Axisymmetric Body at Incidence J94-213
Separation Prevention as an Indirect Problem Based on the Triple-Deck Theory J94-211
Separation Prevention as an Indirect Problem Based on the Triple-Deck Theory J94-211
Modeling Three-Dimensional Gas-Turbine Combustor Model Flow Using Second-Moment Closure J94-210
Direct Simulation Monte Carlo and Navier-Stokes Simulations of Blunt Body Wake Flows J94-208
Swirl Control in an S-Duct at High Angle of Attack J94-194
Laser Interferometer Skin-Friction Measurements of Crossing-Shock-Wave/Turbulent-Boundary-Layer Interactions J94-182
Low-Dimensional Description of the Dynamics in Separated Flow past Thick Airfoils J94-180
Computation of Separated Duct Flows Using the Boundary-Layer Equations J94-176
Fluctuating Wall Pressures near Separation in Highly Swept Turbulent Interactions J94-171
Numerical Simulation of Turbulent Cylinder Juncture Flowfields J94-166

Crossflow Topology of Vortical Flows J94-157
Reattachment Studies of an Oscillating Airfoil Dynamic Stall Flowfield J94-144
Structure of Local Pressure-Driven Three-Dimensional Transient Boundary-Layer Separation J94-143
Computational/Experimental Investigation of Staged Injection into a Mach 2 Flow J94-130
Heat Transfer Measurements and Computations of Swept-Shock-Wave/Boundary-Layer Interactions J94-103
Numerical Model for Circulation-Control Flows J94-100
High Angle-of-Attack Airfoil Performance Improvement by Internal Acoustic Excitation J94-091
Interferometric Investigations of Compressible Dynamic Stall over a Transiently Pitching Airfoil J94-082
Flowfield Measurements in Supersonic Film Cooling Including the Effect of Shock-Wave Interaction J94-081
Sphere Wakes at Moderate Reynolds Numbers in a Turbulent Environment J94-075
Pressure Measurements on a Pitching Airfoil in a Water Channel J94-014
Supersonic Base Flow Experiments in the Near Wake of a Cylindrical Afterbody J94-010

Shock Waves and Detonations

Zones in Coflowing Planar Inviscid Supersonic Twin Streams J94-316
Time-Accurate Local Time Stepping Method Based on Flux Updating J94-287
Noise Reduction Properties of a Multiple-Source Schlieren System J94-252
Investigation of the Interaction of a Blast Wave with an Internal Structure J94-236
Approximations for Weak and Strong Oblique Shock Wave Angles J94-231
Computing Unsteady Shock Waves for Aeroacoustic Applications J94-203
Chemical Recombination in an Expansion Tube J94-192
Practical Formulation of a Positively Conservative Scheme J94-161
Analytic Solutions for Dusty Shock Waves J94-140
Grid Adaptation Using Chimera Composite Overlapping Meshes J94-135
Role of Kutta Waves on Oscillatory Shock Motion on an Airfoil J94-111
Numerical Simulation of Shock-Box Interaction Using an Adaptive Finite Element Scheme J94-098
Vortex Distortion During Vortex-Surface Interaction in a Mach 3 Stream J94-016

Subsonic Flow

Flow Structure in the Wake of a Wishbone Vortex Generator J94-335
Mean Flow Study of Two-Dimensional Subsonic Turbulent Boundary Layers J94-325
Pressure Loss Modulus Correlation for Δp Across Uniformly Distributed-Loss Devices J94-280
Adaptive Computations of Flow Around a Delta Wing with Vortex Breakdown J94-232
Geometry of Thin Liquid Sheet Flows J94-196
Multipoint Inverse Design of an Infinite Cascade of Airfoils J94-109

Supersonic Flow

Enhanced Mixing of Multiple Supersonic Rectangular Jets by Synchronized Screech J94-372
Mach Wave Emission from a High-Temperature Supersonic Jet J94-351
Main Features of Overexpanded Triple Jets J94-331
Effects of Expansions on a Supersonic Boundary Layer: Surface Pressure Measurements J94-327
Logarithmic Laws for Compressible Turbulent Boundary Layers J94-326
Comparison of Coordinate-Invariant and Coordinate-Aligned Upwinding for the Euler Equations J94-267
Turbulent Mixing Noise from Supersonic Jets J94-265
High-Resolution Navier-Stokes Computation of Vortical Flow over a Supersonic Delta Wing J94-258
Noise Reduction Properties of a Multiple-Source Schlieren System J94-252
Velocity Field Imaging in Supersonic Reacting Flows near Atmospheric Pressure J94-251
Measurements of Kelvin-Helmholtz Instabilities in a Supersonic Shear Layer J94-245
Numerical Computations of Supersonic Base Flow with Special Emphasis on Turbulence Modeling J94-233
Design and Operation of a Supersonic Annular Flow Facility J94-225
Behavior of the Johnson-King Turbulence Model in Axisymmetric Supersonic Flows J94-207
Supersonic and Hypersonic Shock/Boundary-Layer Interaction Database J94-205
Boundary Conditions for Unsteady Supersonic Inlet Analyses J94-177
Time Integration Algorithms for the Two-Dimensional Euler Equations on Unstructured Meshes J94-172
Computational/Experimental Investigation of Staged Injection into a Mach 2 Flow J94-130
Airfoil Pressure Measurements During Oblique Shock-Wave/Vortex Interaction in a Mach 3 Stream J94-110
Heat Transfer Measurements and Computations of Swept-Shock-Wave/Boundary-Layer Interactions J94-103
Flowfield Measurements in Supersonic Film Cooling Including the Effect of Shock-Wave Interaction J94-081
Quantitative Investigation of Compressible Mixing: Staged Transverse Injection into Mach 2 Flow J94-074
Performances of Riblets in the Supersonic Regime J94-059
Numerical Study of Unsteady Supersonic Compression Ramp Flows J94-030
Estimate of Convective Velocity in a Supersonic Turbulent Mixing Layer J94-028
Supersonic Base Flow Experiments in the Near Wake of a Cylindrical Afterbody J94-010

Transonic Flow

Comparison of Coordinate-Invariant and Coordinate-Aligned Upwinding for the Euler Equations J94-267
Comparative Study of Higher Order Turbulence Models for Compressible Separated Flows J94-261
Rotating Kirchhoff Method for Three-Dimensional Transonic Blade-Vortex Interaction Hover Noise J94-202
Three-Dimensional Adaptive Grid-Embedding Euler Technique J94-173
Multigrid Convergence of an Implicit Symmetric Relaxation Scheme J94-136
Role of Kutta Waves on Oscillatory Shock Motion on an Airfoil J94-111
Differencing of Density in Compressible Flow for a Pressure-Based Approach J94-093
Evaluation of Navier-Stokes Solutions Using the Integrated Effect of Numerical Dissipation J94-041
Drag and Lift in Nonadiabatic Transonic Flow J94-013

Unsteady Flows

Parallel Processing for Implicit Solutions of the Navier-Stokes Equations J94-368
Eigenanalysis of Unsteady Flows About Airfoils, Cascades, and Wings J94-362
Active Boundary-Layer Control in Diffusers J94-360
Hypersonic Flow Past Open Cavities J94-357
Computation of Oscillating Airfoil Flows with One- and Two-Equation Turbulence Models J94-353
Rotor-Rotor Interaction for Counter-Rotating Fans, Part 1: Three-Dimensional Flowfield Measurements J94-334
Assessment of Second-Order Closure Models in Turbulent Shear Flows J94-315
Unsteady Supersonic Cavity Flow Simulations Using Coupled k-ε and Navier-Stokes Equations J94-301
Comparison of Two Formulations for High-Order Accurate Essentially Nonoscillatory Schemes J94-295
Projection Method for Viscous Incompressible Flow on Quadrilateral Grids J94-294
Time-Accurate Local Time Stepping Method Based on Flux Updating J94-287
Influence of Impingement Edge Geometry on Cavity Flow Oscillations J94-260
Suppression of Dynamic-Stall Vortices over Pitching Airfoils by Leading-Edge Suction J94-247
Application of Essentially Nonoscillatory Schemes to Unsteady Hypersonic Shock-Shock Interference Heating Problems J94-242
Onset of Vortex Breakdown Above a Pitching Delta Wing J94-237
Response of Hot-Element Wall Shear Stress Gages in Unsteady Turbulent Flows J94-216
Low-Dimensional Description of the Dynamics in Separated Flow past Thick Airfoils J94-180
Boundary Conditions for Unsteady Supersonic Inlet Analyses J94-177
Fluctuating Wall Pressures near Separation in Highly Swept Turbulent Interactions J94-171
Vortex Cutting by a Blade, Part 1: General Theory and a Simple Solution J94-170
Numerical Simulation of Vortex-Wedge Interaction J94-168
Reattachment Studies of an Oscillating Airfoil Dynamic Stall Flowfield J94-144
Structure of Local Pressure-Driven Three-Dimensional Transient Boundary-Layer Separation J94-143
Structure of Supersonic Jet Flow and Its Radiated Sound J94-129
Effects of Trailing-Edge Jet Entrainment on Delta Wing Vortices J94-113
Effects of Time Scales on Lift of Airfoils in an Unsteady Stream J94-112
Role of Kutta Waves on Oscillatory Shock Motion on an Airfoil J94-111
Dynamic Pitch-Up of a Delta Wing J94-102

Effects of Periodic Spanwise Blowing on Delta-Wing Configuration Characteristics J94-101
Numerical Simulation of Shock-Box Interaction Using an Adaptive Finite Element Scheme J94-098
Interaction of a Streamwise Vortex with a Free Surface J94-083
Interferometric Investigations of Compressible Dynamic Stall over a Transiently Pitching Airfoil J94-082
Vortex Breakdown over Delta Wings in Unsteady Freestream J94-060
Infrared Imaging of Large-Amplitude, Low-Frequency Disturbances on a Planar Jet J94-044
Unsteady Flow Phenomena over Delta Wings at High Angle of Attack J94-033
Numerical Study of Unsteady Supersonic Compression Ramp Flows J94-030
Pressure Measurements on a Pitching Airfoil in a Water Channel J94-014
Numerical Investigations of Transitional H_2/N_2 Jet Diffusion Flames J94-011
Unsteady Panel Method for Flows with Multiple Bodies Moving Along Various Paths J94-008
Head-On Parallel Blade-Vortex Interaction J94-002

Viscous Non-Boundary-Layer Flows

Parallel Processing for Implicit Solutions of the Navier-Stokes Equations J94-368
Prediction of Turbulent Flow Through a Transition Duct Using a Second-Moment Closure J94-330
Adaptive Finite Element Method for Turbulent Flow near a Propeller J94-329
Validation Procedure for the Analysis of Shock-Wave/Boundary-Layer Interaction Problems J94-271
Linearized Theory for Pulse Tube Cryocooler Performance J94-249
Effect of Orifice Flow and Heat Transfer on Gas Spring Hysteresis J94-248
Pressure Measurements on a Pitching Airfoil in a Water Channel J94-014

Vortices

Vorticity in an Inviscid Fluid at Hypersonic Speeds J94-370
Effects of Spatial Order of Accuracy on the Computation of Vortical Flowfields J94-369
Flow Structure in the Wake of a Wishbone Vortex Generator J94-335
Flow Structure in the Wake of a Wishbone Vortex Generator J94-335
Prediction of Turbulent Flow Through a Transition Duct Using a Second-Moment Closure J94-330
Suppression of Vortex Asymmetry and Side Force on a Circular Cone J94-317
Interaction of a Streamwise Vortex with a Thin Plate: A Source of Turbulent Buffeting J94-302
Asymmetric Vortex Pair in the Wake of a Circular Cylinder J94-299
Vortical and Turbulent Structure of a Lobed Mixer Free Shear Layer J94-275
Onset of Vortex Breakdown Above a Pitching Delta Wing J94-237
Adaptive Computations of Flow Around a Delta Wing with Vortex Breakdown J94-232
Elliptic Tip Effects on the Vortex Wake of an Axisymmetric Body at Incidence J94-213
Vortex Cutting by a Blade, Part II: Computations of Vortex Response J94-212
Effect of Initial Conditions on Vortices in a Turbulent Near Wake J94-178
Vortex Cutting by a Blade, Part 1: General Theory and a Simple Solution J94-170
Numerical Simulation of Vortex-Wedge Interaction J94-168
Coherent Structure in a Combusting Jet in Crossflow J94-167
Numerical Simulation of Turbulent Cylinder Juncture Flowfields J94-166
Crossflow Topology of Vortical Flows J94-157
Symmetry Breaking in Vortical Flows over Cones—Theory and Numerical Experiments J94-145
Characterization of Droplet/Vapor/Vortex Interactions in a Two-Dimensional Shear Layer J94-126
Effect of Imposed Pressure Gradients on the Viscous Stability of Longitudinal Vortices J94-125
Effects of Trailing-Edge Jet Entrainment on Delta Wing Vortices J94-113
Effects of Time Scales on Lift of Airfoils in an Unsteady Stream J94-112
Airfoil Pressure Measurements During Oblique Shock-Wave/Vortex Interaction in a Mach 3 Stream J94-110
Dynamic Pitch-Up of a Delta Wing J94-102
Interaction of a Streamwise Vortex with a Free Surface J94-083
Near Field of a Coaxial Jet With and Without Axial Excitation J94-076
Infrared Imaging of Large-Amplitude, Low-Frequency Disturbances on a Planar Jet J94-044
Unsteady Flow Phenomena over Delta Wings at High Angle of Attack J94-033
Vortex Distortion During Vortex-Surface Interaction in a Mach 3 Stream J94-016
Simple Numerical Criterion for Vortex Breakdown J94-015
Numerical Investigations of Transitional H_2/N_2 Jet Diffusion Flames J94-011
Comment on "Control of Vortices on a Delta Wing by Leading-Edge Injection" J93-183
Reply by the Authors to L. E. Ericsson J93-183

Chronological Index

J92-438 Extension of the λ Formulation to Imperfect Gas Flows. Diego Lentini, *University of Rome "La Sapienza", Italy* (**30**, 11, p. 2785) Technical Note
Technical Comment by G. Christy and G. Emanuel, *University of Oklahoma* (**32**, 7, p. 1554)
Reply (**32**, 7, p. 1554)

J93-183 Control of Vortices on a Delta Wing by Leading-Edge Injection. W. Gu, O. Robinson, and D. Rockwell, *Lehigh University* (**31**, 7, p. 1177) Article
Technical Comment by L. E. Ericsson (**32**, 10, p. 2134)
Reply (**32**, 10, p. 2135)

J93-214 Nonlinear Response of Asymmetrically Laminated Plates in Cylindrical Bending. Erasmo Carrera, *DIAS-Politecnico di Torino, Italy* (**31**, 7, p. 1353) Technical Note
Technical Comment by C. T. Sun, *Purdue University* (**32**, 10, p. 2135)
Reply (**32**, 10, p. 2135)

J93-252 Skin Friction and Velocity Profile Family for Compressible Turbulent Boundary Layers. P. G. Huang, *Eloret Institute*; P. Bradshaw, *Stanford University*; and T. J. Coakley, *NASA Ames Research Center* (**31**, 9, p. 1600) Article
Technical Comment by F. Motallebi, *Delft University of Technology, The Netherlands* (**32**, 9, p. 1938)
Reply (**32**, 9, p. 1939)

J93-336 Spin Stability of Undamped Flexible Structures Rotating About the Minor Axis. Clark R. Dohrmann, *Sandia National Laboratories*; and Henry R. Busby, *Ohio State University* (**31**, 11, p. 2154) Article
Errata (**32**, 1, p. 224)

J94-001 Influence of Wing Shapes on Surface Pressure Fluctuations at Wing-Body Junctions. Semih M. Ölçmen and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**32**, 1, p. 6) Article based on AIAA Paper 92-0433

J94-002 Head-On Parallel Blade-Vortex Interaction. Soogab Lee and Daniel Bershader, *Stanford University* (**32**, 1, p. 16) Article based on AIAA Paper 91-3277

J94-003 Active Control of Fan Noise from a Turbofan Engine. Russell H. Thomas, Ricardo A. Burdisso, Christopher R. Fuller, and Walter F. O'Brien, *Virginia Polytechnic Institute and State University* (**32**, 1, p. 23) Article based on AIAA Paper 93-0597

J94-004 Flow Alteration and Drag Reduction by Riblets in a Turbulent Boundary Layer. Seong-Ryong Park and James M. Wallace, *University of Maryland* (**32**, 1, p. 31) Article based on AIAA Paper 93-3256

J94-005 Effect of Artificial Viscosity on Three-Dimensional Flow Solutions. Eli Turkel, *Tel-Aviv University, Israel*; and Veer N. Vatsa, *NASA Langley Research Center* (**32**, 1, p. 39) Article based on AIAA Paper 90-1444

J94-006 Validity of Linearized Unsteady Euler Equations with Shock Capturing. Dana R. Lindquist and Michael B. Giles, *Massachusetts Institute of Technology* (**32**, 1, p. 46) Article based on AIAA Paper 91-1598 CP914

J94-007 Generic Parallel Adaptive-Grid Navier-Stokes Algorithm. Y. Kallinderis and A. Vidwans, *University of Texas at Austin* (**32**, 1, p. 54) Article

J94-008 Unsteady Panel Method for Flows with Multiple Bodies Moving Along Various Paths. Thomas F. Richason and Joseph Katz, *San Diego State University*; and Dale L. Ashby, *NASA Ames Research Center* (**32**, 1, p. 62) Article based on AIAA Paper 93-0640

J94-009 Improving the Efficiency of Aerodynamic Shape Optimization. Greg W. Burgreen, Oktay Baysal, and Mohamed E. Eleshaky, *Old Dominion University* (**32**, 1, p. 69) Article based on AIAA Paper 92-4697 CP9213

J94-010 Supersonic Base Flow Experiments in the Near Wake of a Cylindrical Afterbody. J. L. Herrin and J. C. Dutton, *University of Illinois at Urbana–Champaign* (**32**, 1, p. 77) Article based on AIAA Paper 93-2924

J94-011 Numerical Investigations of Transitional H_2/N_2 Jet Diffusion Flames. V. R. Katta and L. P. Goss, *Systems Research Laboratories, Inc.*; and W. M. Roquemore, *Wright Laboratory* (**32**, 1, p. 84) Article based on AIAA Paper 92-0335

J94-012 Atomic Oxygen Generators for Surface Studies in Low Earth Orbit. Masahito Tagawa, Masakazu Tomita, Masataka Umeno, and Nobuo Ohmae, *Osaka University, Japan* (**32**, 1, p. 95) Article

J94-013 Drag and Lift in Nonadiabatic Transonic Flow. Günter H. Schnerr and Ulrich Dohrmann, *University of Karlsruhe, Germany* (**32**, 1, p. 101) Article based on AIAA Paper 91-1716

J94-014 Pressure Measurements on a Pitching Airfoil in a Water Channel. Rand N. Conger, *John Graham Associates*; and B. R. Ramaprian, *Washington State University* (**32**, 1, p. 108) Article based on AIAA Paper 93-0814

J94-015 Simple Numerical Criterion for Vortex Breakdown. B. A. Robinson, R. M. Barnett, and S. Agrawal, *McDonnell Douglas Corporation* (**32**, 1, p. 116) Article based on AIAA Paper 92-0057

J94-016 Vortex Distortion During Vortex-Surface Interaction in a Mach 3 Stream. Iraj M. Kalkhoran, *Polytechnic University* (**32**, 1, p. 123) Article based on AIAA Paper 93-0761

J94-017 Hydrogen Fluoride Chemical Laser Multiple-Pass Amplifier Performance. R. E. Waldo, L. H. Sentman, P. T. Theodoropoulos, and D. L. Carroll, *University of Illinois* (**32**, 1, p. 130) Article

J94-018 Quasi-One-Dimensional Modeling of a Free-Piston Shock Tunnel. P. A. Jacobs, *University of Queensland, Australia* (**32**, 1, p. 137) Article based on AIAA Paper 93-0352

J94-019 Some Recent Results for Nonlinear Acoustics in Combustion Chambers. F. E. C. Culick, *California Institute of Technology* (**32**, 1, p. 146) Survey Paper based on AIAA Paper 90-3927

J94-020 Residual Flexibility Test Method for Verification of Constrained Structural Models. John R. Admire, Michael L.

Tinker, and Edward W. Ivey, *NASA Marshall Space Flight Center* (**32**, 1, p. 170) Article based on AIAA Paper 92-2325 CP922

J94-021 Structural Damage Detection and Identification Using Neural Networks. Poyu Tsou and M.-H. Herman Shen, *Ohio State University* (**32**, 1, p. 176) Article based on AIAA Paper 93-1708 CP931

J94-022 Improved Method for Calculating Strain Energy Release Rate Based on Beam Theory. C. T. Sun and R. K. Pandey, *Purdue University* (**32**, 1, p. 184) Article

J94-023 Treatment of Material Creep and Nonlinearities in Flexible Multibody Dynamics. M. Xie and F. M. L. Amirouche, *University of Illinois at Chicago* (**32**, 1, p. 190) Article

J94-024 Approximation in Nonhierarchic System Optimization. J. E. Renaud, *University of Notre Dame*; and G. A. Gabriele, *Rensselaer Polytechnic Institute* (**32**, 1, p. 198) Article based on AIAA Paper 92-4826 CP9213

J94-025 Heat Release Effects on the Instability of Parallel Shear Layers. U. Hegde, *Sverdrup Technology, Inc.* (**32**, 1, p. 206) Technical Note

J94-026 Long Distance Propagation Model and Its Application to Aircraft En Route Noise Prediction. Kingo J. Yamamoto and Michael J. Donelson, *McDonnell Douglas Aerospace—Transport Aircraft* (**32**, 1, p. 207) Technical Note

J94-027 Three-Dimensional Laminar Boundary Layer in a Constant Pressure Diverging Flow—Blasius Equivalent. O. N. Ramesh, J. Dey, and A. Prabhu, *Indian Institute of Science* (**32**, 1, p. 209) Technical Note

J94-028 Estimate of Convective Velocity in a Supersonic Turbulent Mixing Layer. Stéphane Barre, *Institut de Mécanique de Marseille, France* (**32**, 1, p. 211) Technical Note

J94-029 Quasiglobal Reaction Model for Ethylene Combustion. D. J. Singh, *Analytical Services & Materials, Inc.*; and Casimir J. Jachimowski, *NASA Langley Research Center* (**32**, 1, p. 213) Technical Note

J94-030 Numerical Study of Unsteady Supersonic Compression Ramp Flows. S. O. Park, Y. M. Chung, and H. J. Sung, *Korea Advanced Institute of Science and Technology* (**32**, 1, p. 216) Technical Note based on AIAA Paper 93-0883

J94-031 Concentration Measurements in a Transverse Jet by Planar Laser-Induced Fluorescence of Acetone. A. Lozano, S. H. Smith, M. G. Mungal, and R. K. Hanson, *Stanford University* (**32**, 1, p. 218) Technical Note

J94-032 Effects of In-Plane Displacements on Frequency and Damping of Composite Laminates. Kyo-Nam Koo and In Lee, *Korea Advanced Institute of Science and Technology* (**32**, 1, p. 221) Technical Note

J94-033 Unsteady Flow Phenomena over Delta Wings at High Angle of Attack. Ismet Gursul, *University of Cincinnati* (**32**, 2, p. 225) Article

J94-034 Parametric Computational Study of Isolated Blade-Vortex Interaction Noise. Judith M. Gallman, *NASA Ames Research Center* (**32**, 2, p. 232) Article

J94-035 Asymptotic Theory of Supersonic Propeller Noise. Edmane Envia, *Sverdrup Technology, Inc.* (**32**, 2, p. 239) Article

J94-036 Simulation of Transition with a Two-Equation Turbulence Model. David C. Wilcox, *DCW Industries, Inc.* (**32**, 2, p. 247) Article

J94-037 Optimization of Viscoelastic Compliant Walls for Transition Delay. Andrew E. Dixon, Anthony D. Lucey, and Peter W. Carpenter, *University of Warwick, England, UK* (**32**, 2, p. 256) Article

J94-038 Upwind Method for Simulation of Viscous Flow on Adaptively Refined Meshes. M. J. Aftosmis, *Wright Laboratory* (**32**, 2, p. 268) Article

J94-039 Efficient Cell-Vertex Upwind Scheme for the Two-Dimensional Euler Equations. C.-C. Rossow, *Deutsche Forschungsanstalt für Luft- und Raumfahrt, Germany* (**32**, 2, p. 278) Article based on AIAA Paper 93-0071

J94-040 Surface Boundary Conditions for the Numerical Solution of the Euler Equations. A. Dadone, *Politecnico di Bari, Italy*; and B. Grossman, *Virginia Polytechnic Institute and State University* (**32**, 2, p. 285) Article

J94-041 Evaluation of Navier-Stokes Solutions Using the Integrated Effect of Numerical Dissipation. R. R. Varma and D. A. Caughey, *Cornell University* (**32**, 2, p. 294) Article based on AIAA Paper 93-0539

J94-042 Experimental, Analytical, and Computational Methods Applied to Hypersonic Compression Ramp Flows. G. Simeonides, *von Kármán Institute for Fluid Dynamics, Belgium*; W. Haase, *Dornier Luftfahrt GmbH, Germany*; and M. Manna, *von Kármán Institute for Fluid Dynamics, Belgium* (**32**, 2, p. 301) Article

J94-043 Numerical Investigation of Mixing Augmentation Behind Oblique Shock Waves. V. I. Vasilev, S. N. Zakotenko, S. Ju Krasheninnikov, and V. A. Stepanov, *Central Institute of Aviation Motors, Russia* (**32**, 2, p. 311) Article

J94-044 Infrared Imaging of Large-Amplitude, Low-Frequency Disturbances on a Planar Jet. Robert B. Farrington and Scott D. Claunch, *National Renewable Energy Laboratory* (**32**, 2, p. 317) Article

J94-045 Nonlocal Thermodynamic Equilibrium in Laser-Sustained Plasmas. David K. Zerkle and Herman Krier, *University of Illinois at Urbana–Champaign* (**32**, 2, p. 324) Article based on AIAA Paper 92-2991

J94-046 Reactive and Viscous Flow in Hypersonic Nozzles. D. Zeitoun, E. Boccaccio, M. C. Druguet, and M. Imbert, *Université de Provence, France* (**32**, 2, p. 333) Article

J94-047 Analysis of Thermal Ignition in the Supersonic Mixing Layer. H. G. Im, B. H. Chao, J. K. Bechtold, and C. K. Law, *Princeton University* (**32**, 2, p. 341) Article based on AIAA Paper 93-0449

J94-048 Sensitivity Analysis of Aeroelastic Response of a Wing in Transonic Flow. Rakesh K. Kapania and Jason Cherian Issac, *Virginia Polytechnic Institute and State University* (**32**, 2, p. 350) Article based on AIAA Paper 93-1646 CP931

J94-049 Damage Evolution Modeling in Orthotropic Laminated Composites. Yu. A. Dzenis and S. P. Joshi, *University of Texas at Arlington*; and A. E. Bogdanovich, *Latvian Academy of Sciences, Latvia* (**32**, 2, p. 357) Article based on AIAA Paper 92-2325 CP922

J94-050 Boundary Variational Formulation of a Frictionless Contact Problem for Composite Finite Bodies. Slobodan R. Sipcic, Vladimir L. Rabinovich, and Robert A. Rugg, *Boston University* (**32**, 2, p. 365) Article based on AIAA Paper 93-1610 CP931

J94-051 Parametric Quadratic Programming Method for Dynamic Contact Problems with Friction. S. M. Sun, *Institute of Space and Astronautical Science, Japan*; H. S. Tzou, *University of Kentucky*; and M. C. Natori, *Institute of Space and Astronautical Science, Japan* (**32**, 2, p. 371) Article based on AIAA Paper 93-1388 CP931

J94-052 New Family of Modal Methods for Calculating Eigenvector Derivatives. Mehmet A. Akgün, *Middle East Technical University, Turkey* (**32**, 2, p. 379) Article based on AIAA Paper 92-4747 CP9213

J94-053 Vibratory Characteristics of Cantilevered Rectangular Shallow Shells of Variable Thickness. K. M. Liew and C. W. Lim, *Nanyang Technological University, Singapore* (**32**, 2, p. 387) Article

J94-054 Second-Order Structural Identification Procedure via State-Space-Based System Identification. K. F. Alvin and K. C. Park, *University of Colorado* (**32**, 2, p. 397) Article based on AIAA Paper 92-4387 CP928

J94-055 Automatic Choice of Measurement Locations for Dynamic Testing. J. E. T. Penny, M. I. Friswell, and S. D. Garvey, *Aston University, England, UK* (**32**, 2, p. 407) Article

J94-056 Optimum Design of Nonproportionally Damped Structures Using Method of Optimality Criterion. Ting-Yu Chen, *National Chung-Hsing University, Taiwan, ROC*; and Bo Ping Wang, *University of Texas at Arlington* (**32**, 2, p. 415) Article based on AIAA Paper 92-2560 CP922

J94-057 Truss Topology Optimization with Simultaneous Analysis and Design. S. Sankaranarayanan, Raphael T. Haftka, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**32**, 2, p. 420) Article based on AIAA Paper 92-2315 CP922

J94-058 Thermomechanical Coupling Effects at High Flight Speeds. O. R. Odabas, *Ohio State University*; and N. Sarigul-Klijn, *University of California, Davis* (**32**, 2, p. 425) Article based on AIAA Paper 92-5018

J94-059 Performances of Riblets in the Supersonic Regime. E. Coustols and J. Cousteix, *CERT/ONERA, France* (**32**, 2, p. 431) Technical Note

J94-060 Vortex Breakdown over Delta Wings in Unsteady Freestream. Ismet Gursul, *University of Cincinnati*; and Chih-Ming Ho, *University of California, Los Angeles* (**32**, 2, p. 433) Technical Note based on AIAA Paper 93-0555

J94-061 Boundary Diffusion Controlled Creep Model in Nanocrystals. Konstantinenicholas P. Kaniaris and Constantinos S. Lyrintzis, *San Diego State University* (**32**, 2, p. 436) Technical Note

J94-062 Elastodynamic Characteristics of Hollow Cantilever Beams Containing an Electrorheological Fluid: Experimental Results. Seung-Bok Choi and Yong-Kun Park, *Inha University, Korea*; and Moon-Suk Suh, *Agency for Defense Development, Korea* (**32**, 2, p. 438) Technical Note

J94-063 Determining Free-Free Modes from Experimental Data of Constrained Structures. Su-Huan Chen, Zhong-Sheng Liu, Wan-Zhi Han, and Ai-Jun Ma, *Jilin University of Technology, PRC* (**32**, 2, p. 440) Technical Note

J94-064 Effect of Reynolds Number and Turbulence on Airfoil Aerodynamics at –90-Degree Incidence. Paul M. Stremel, *NASA Ames Research Center* (**32**, 3, p. 449) Article based on AIAA Paper 93-0206

J94-065 Stochastic Approach to Noise Modeling for Free Turbulent Flows. Walid Béchara, Christophe Bailly, and Philippe Lafon, *Electricité de France*; and Sébastien M. Candel, *Ecole Centrale Paris, France* (**32**, 3, p. 455) Article

J94-066 Mixing Enhancement by and Noise Characteristics of Streamwise Vortices in an Air Jet. C. B. Rogers, *Tufts University*; and D. E. Parekh, *McDonnell Douglas Research Laboratories* (**32**, 3, p. 464) Article

J94-067 Design Optimization Methods for Rectangular Panels with Minimal Sound Radiation. John S. Lamancusa, *Pennsylvania State University*; and Hans A. Eschenauer, *University of Siegen, Germany* (**32**, 3, p. 472) Article based on AIAA Paper 92-4768

J94-068 Reduction of Blade-Vortex Interaction Noise Through Porous Leading Edge. Soogab Lee, *NASA Ames Research Center* (**32**, 3, p. 480) Article based on AIAA Paper 93-0601

J94-069 Design and Implementation of a Parallel Unstructured Euler Solver Using Software Primitives. R. Das, D. J. Mavriplis, J. Saltz, S. Gupta, and R. Ponnusamy, *ICASE, NASA Langley Research Center* (**32**, 3, p. 489) Article based on AIAA Paper 92-0562

J94-070 Parallel Dynamic Load-Balancing Algorithm for Three-Dimensional Adaptive Unstructured Grids. A. Vidwans and Y. Kallinderis, *University of Texas at Austin*; and V. Venkatakrishnan, *Institute for Computer Applications in Sciences and Engineering* (**32**, 3, p. 497) Article

J94-071 Compressible Navier-Stokes Computations of Multielement Airfoil Flows Using Multiblock Grids. T. E. Nelson, D. W. Zingg, and G. W. Johnston, *University of Toronto, Canada* (**32**, 3, p. 506) Article

J94-072 Nonreflective Boundary Conditions for High-Order Methods. H. Atkins, *NASA Langley Research Center*; and Jay Casper, *ViGYAN, Inc.* (**32**, 3, p. 512) Article based on AIAA Paper 93-0152

J94-073 General Solution Procedure for Flows in Local Chemical Equilibrium. Carey F. Cox and Pasquale Cinnella, *Mississippi State University* (**32**, 3, p. 519) Article based on AIAA Paper 93-0892

J94-074 Quantitative Investigation of Compressible Mixing: Staged Transverse Injection into Mach 2 Flow. Steven D. Hollo, James C. McDaniel, and Roy J. Hartfield Jr., *University of Virginia* (**32**, 3, p. 528) Article based on AIAA Paper 92-0093

J94-075 Sphere Wakes at Moderate Reynolds Numbers in a

Turbulent Environment. J.-S. Wu and G. M. Faeth, *University of Michigan* (**32**, 3, p. 535) Article

J94-076 Near Field of a Coaxial Jet With and Without Axial Excitation. Ryan B. Wicker and John K. Eaton, *Stanford University* (**32**, 3, p. 542) Article based on AIAA Paper 93-0651

J94-077 Development of a Large-Aspect-Ratio Rectangular Turbulent Free Jet. W. R. Quinn, *St. Francis Xavier University, Canada* (**32**, 3, p. 547) Article

J94-078 Active Open-Loop Control of Particle Dispersion in Round Jets. Ellen K. Longmire, *University of Minnesota*; and John K. Eaton, *Stanford University* (**32**, 3, p. 555) Article

J94-079 Ionization of NO at High Temperature. C. Frederick Hansen, *University of Oregon* (**32**, 3, p. 564) Article

J94-080 Stationary Premixed Flames in Spherical and Cylindrical Geometries. P. D. Ronney, *University of Southern California*; and K. N. Whaling, A. Abbud-Madrid, J. L. Gatto, and V. L. Pisowicz, *Princeton University* (**32**, 3, p. 569) Article

J94-081 Flowfield Measurements in Supersonic Film Cooling Including the Effect of Shock-Wave Interaction. K. A. Juhany and M. L. Hunt, *California Institute of Technology* (**32**, 3, p. 578) Article based on AIAA Paper 92-2950

J94-082 Interferometric Investigations of Compressible Dynamic Stall over a Transiently Pitching Airfoil. M. S. Chandrasekhara, *Naval Postgraduate School*; L. W. Carr, *NASA Ames Research Center*; and M. C. Wilder, *MCAT Institute* (**32**, 3, p. 586) Article based on AIAA Paper 93-0211

J94-083 Interaction of a Streamwise Vortex with a Free Surface. Turgut Sarpkaya and Donald E. Neubert, *Naval Postgraduate School* (**32**, 3, p. 594) Article based on AIAA Paper 93-0556

J94-084 Active Plate and Missile Wing Development Using Directionally Attached Piezoelectric Elements. Ron Barrett, *University of Kansas* (**32**, 3, p. 601) Article

J94-085 Consideration of Plant Uncertainties in the Optimum Structural-Control Design. N. S. Khot and S. A. Heise, *Wright Laboratory* (**32**, 3, p. 610) Article based on AIAA Paper 92-1150

J94-086 Stress-Based Elastodynamic Discrete Laminated Plate Theory. G. A. Schoeppner, *Wright Laboratory*; and W. E. Wolfe and R. S. Sandhu, *Ohio State University* (**32**, 3, p. 616) Article based on AIAA Paper 93-1512 CP922
Errata (**32**, 5, p. 1106)

J94-087 Benchmark Elasticity Solution for Locally Loaded Laminated Orthotropic Cylindrical Shells. K. Bhaskar and T. K. Varadan, *Indian Institute of Technology* (**32**, 3, p. 627) Article

J94-088 Theory of Vibrating Diaphragm-Type Pressure Sensor. Zhou You-He and Yeh Kai-Yuan, *Lanzhou University, PRC*; and F. P. J. Rimrott, *University of Toronto, Canada* (**32**, 3, p. 633) Article

J94-089 Buckling of Moderately Thick, Laminated Cylindrical Shells Under Torsion. A. Tabiei and G. J. Simitses, *University of Cincinnati* (**32**, 3, p. 639) Article based on AIAA Paper 93-1334 CP931

J94-090 Buckling Analysis of Laminated Cylindrical Shells with Arbitrary Noncircular Cross Section. Izhak Sheinman and Marina Firer, *Technion—Israel Institute of Technology* (**32**, 3, p. 648) Article

J94-091 High Angle-of-Attack Airfoil Performance Improvement by Internal Acoustic Excitation. Fei-Bin Hsiao, *National Cheng Kung University, Taiwan, ROC*; and Rong-Nan Shyu and Ray C. Chang, *Chung-San Institute of Science and Technology, Taiwan, ROC* (**32**, 3, p. 655) Technical Note

J94-092 Using the Liou-Steffen Algorithm for the Euler and Navier-Stokes Equations. Lorenzo Bergamini and Pasquale Cinnella, *Mississippi State University* (**32**, 3, p. 657) Technical Note based on AIAA Paper 93-0876

J94-093 Differencing of Density in Compressible Flow for a Pressure-Based Approach. G. P. Greyvenstein and J. P. Meyer, *Potchefstroom University for CHE, South Africa* (**32**, 3, p. 659) Technical Note

J94-094 Calculation of Matched Pressure Properties of Low-Altitude Rocket Plumes. Terrence M. Cain, *New College, England, UK* (**32**, 3, p. 661) Technical Note

J94-095 Analysis of Interlaminar Stresses in the Torsion of Symmetric Laminates. James M. Whitney, *University of Dayton* (**32**, 3, p. 662) Technical Note based on AIAA Paper 93-1507 CP931

J94-096 Influence of Clamp-Up Force on the Strength of Bolted Composite Joints. Walter J. Horn, *Wichita State University*; and Ron R. Schmitt, *Boeing Company* (**32**, 3, p. 665) Technical Note

J94-097 Two-Dimensional Unsteady Leading-Edge Separation on a Pitching Airfoil. P. Ghosh Choudhuri and D. D. Knight, *Rutgers University*; and M. R. Visbal, *U.S. Air Force Wright Laboratory* (**32**, 4, p. 673) Article

J94-098 Numerical Simulation of Shock-Box Interaction Using an Adaptive Finite Element Scheme. Joseph D. Baum, *Science Applications International Corporation*; and Rainald Löhner, *George Washington University* (**32**, 4, p. 682) Article

J94-099 Time and Flow-Direction Responses of Shear-Stress-Sensitive Liquid Crystal Coatings. Daniel C. Reda, Joseph J. Muratore Jr., and James T. Heineck, *NASA Ames Research Center* (**32**, 4, p. 693) Article based on AIAA Paper 93-0183

J94-100 Numerical Model for Circulation-Control Flows. Richard G. Holz and Ahmed A. Hassan, *McDonnell Douglas Helicopter Company*; and Helen L. Reed, *Arizona State University* (**32**, 4, p. 701) Article

J94-101 Effects of Periodic Spanwise Blowing on Delta-Wing Configuration Characteristics. J. Meyer and A. Seginer, *Technion—Israel Institute of Technology* (**32**, 4, p. 708) Article based on AIAA Paper 92-4359 CP929

J94-102 Dynamic Pitch-Up of a Delta Wing. O. K. Rediniotis, S. M. Klute, N. T. Hoang, and D. P. Telionis, *Virginia Polytechnic Institute and State University* (**32**, 4, p. 716) Article

J94-103 Heat Transfer Measurements and Computations of Swept-Shock-Wave/Boundary-Layer Interactions. Y. Lee and G. S. Settles, *Pennsylvania State University*; and C. C. Horstman, *NASA Ames Research Center* (**32**, 4, p. 726) Article based on AIAA Paper 92-3665

J94-104 Turbulence Models for Compressible Boundary Layers. P. G. Huang, *Eloret Institute*; P. Bradshaw, *Stanford University*; and T. J. Coakley, *NASA Ames Research Center* (**32**, 4, p. 735) Article

J94-105 Adaptive Finite Element Method for Thermal Flow Problems. Dominique Pelletier, Jean-François Hétu, and Florin Ilinca, *École Polytechnique de Montréal, Canada* (**32**, 4, p. 741) Article based on AIAA Paper 93-0920

J94-106 Automated Adaptive Time-Discontinuous Finite Element Method for Unsteady Compressible Airfoil Aerodynamics. B. E. Webster, M. S. Shephard, Z. Rusak, and J. E. Flaherty, *Rensselaer Polytechnic Institute* (**32**, 4, p. 748) Article based on AIAA Paper 93-0339

J94-107 Compressible Turbulence Measurements in a High-Speed High-Reynolds-Number Mixing Layer. Rodney D. W. Bowersox, *Air Force Institute of Technology*; and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (**32**. 4, p. 758) Article based on AIAA Paper 93-0660

J94-108 Parameters of Nocilla Gas/Surface Interaction Model from Measured Accommodation Coefficients. Frank G. Collins, *University of Tennessee Space Institute*; and E. C. Knox, *Remtech, Inc.* (**32**, 4, p. 765) Article

J94-109 Multipoint Inverse Design of an Infinite Cascade of Airfoils. Michael S. Selig, *University of Illinois at Urbana-Champaign* (**32**, 4, p. 774) Article based on AIAA Paper 92-2650 CP926

J94-110 Airfoil Pressure Measurements During Oblique Shock-Wave/Vortex Interaction in a Mach 3 Stream. Iraj M. Kalkhoran and Pasquale M. Sforza, *Polytechnic University* (**32**, 4, p. 783) Article based on AIAA Paper 92-2631 CP926

J94-111 Role of Kutta Waves on Oscillatory Shock Motion on an Airfoil. B. H. K. Lee and H. Murty, *National Research Council, Canada*; and H. Jiang, *Queen's University, Canada* (**32**, 4, p. 789) Article based on AIAA Paper 93-1589 CP931

J94-112 Effects of Time Scales on Lift of Airfoils in an Unsteady Stream. Ismet Gursul, *University of Cincinnati*; Hank Lin, *University of Southern California*; and Chih-Ming Ho, *University of California, Los Angeles* (**32**, 4, p. 797) Article

J94-113 Effects of Trailing-Edge Jet Entrainment on Delta Wing Vortices. H. E. Helin, *U.S. Air Force Academy*; and C. W. Watry, *George Washington University* (**32**, 4, p. 802) Article based on AIAA Paper 94-0072

J94-114 Doppler Lidar Investigation of Wake Vortex Transport Between Closely Spaced Parallel Runways. Friedrich Köpp, *DLR, German Aerospace Research Establishment, Germany* (**32**, 4, p. 805) Article

J94-115 Dynamic-Stall and Structural-Modeling Effects on Helicopter Blade Stability with Experimental Correlation. Dinesh Barwey, *Washington University*; and Gopal H. Gaonkar, *Florida Atlantic University* (**32**, 4, p. 811) Article

J94-116 Aeroelastic Response of Composite Rotor Blades Considering Transverse Shear and Structural Damping. Sung Nam Jung and Seung Jo Kim, *Seoul National University, Korea* (**32**, 4, p. 820) Article

J94-117 Application of a *p*-Version Finite Element Code to Analysis of Cracks. A. F. Liu and J. J. Gurbach, *Rockwell International North American Aircraft* (**32**, 4, p. 828) Article based on AIAA Paper 93-1450 CP931

J94-118 Structural Damage Assessment Using a Generalized Minimum Rank Perturbation Theory. Mohamed Kaouk, *University of Florida*; and David C. Zimmerman, *University of Houston* (**32**, 4, p. 836) Article

J94-119 Nonprobabilistic, Convex-Theoretic Modeling of Scatter in Material Properties. Isaac Elishakoff, Pierre Elisseeff, and Stewart A. L. Glegg, *Florida Atlantic University* (**32**, 4, p. 843) Article

J94-120 Analysis of Impact of a Moving Body on an Orthotropic Elastic Plate. R. K. Mittal and M. R. Khalili, *Indian Institute of Technology* (**32**, 4, p. 850) Article

J94-121 Vibration Analysis of Mistuned Bladed-Disk Assemblies—Inverse Approach. K. Y. Sanliturk and M. Imregun, *Imperial College of Science, Technology, and Medicine, England, UK* (**32**, 4, p. 857) Article

J94-122 Approach for Simultaneous Optimization of a Structure and Control System. I. Kajiwara, K. Tsujioka, and A. Nagamatsu, *Tokyo Institute of Technology, Japan* (**32**, 4, p. 866) Article based on AIAA Paper 93-1467 CP931

J94-123 Measurements of Droplet Dispersion in Heated and Unheated Turbulent Jets. Charles J. Call and Ian M. Kennedy, *University of California, Davis* (**32**, 4, p. 874) Technical Note based on AIAA Paper 93-0904

J94-124 Numerical Simulation of Acoustic Waves in a Combustor Using Total-Variation-Diminishing Schemes. Z. J. Wang, H. Q. Yang, and A. J. Przekwas, *CFD Research Corporation* (**32**, 4, p. 875) Technical Note based on AIAA Paper 93-0111

J94-125 Effect of Imposed Pressure Gradients on the Viscous Stability of Longitudinal Vortices. Robert E. Spall, *University of South Alabama* (**32**, 4, p. 878) Technical Note

J94-126 Characterization of Droplet/Vapor/Vortex Interactions in a Two-Dimensional Shear Layer. R. D. Hancock, *U.S. Air Force Wright Laboratory*; and L. P. Chin, *Systems Research Laboratories, Inc.* (**32**, 4, p. 881) Technical Note based on AIAA Paper 93-0416

J94-127 Effect of Partial Thickness Actuation on Stress Concentration Reduction near a Hole. Pradeep K. Sensharma, Mohammad H. Kadivar, and Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (**32**, 4, p. 884) Technical Note

J94-128 Buckling and Vibration Analysis of Skew Plates by the Differential Quadrature Method. X. Wang, A. G. Striz, and C. W. Bert, *University of Oklahoma* (**32**, 4, p. 886) Technical Note

J94-129 Structure of Supersonic Jet Flow and Its Radiated Sound. Reda R. Mankbadi, M. Ehtesham Hayer, and Louis A. Povinelli, *NASA Lewis Research Center* (**32**, 5, p. 897) Article based on AIAA Paper 93-0549

J94-130 Computational/Experimental Investigation of Staged Injection into a Mach 2 Flow. D. R. Eklund, *National Research Council*; D. G. Fletcher, R. J. Hartfield Jr., and J. C. McDaniel, *University of Virginia*; G. B. Northam, *NASA Langley Research Center*; and C. L. Dancey and J. A. Wang, *Virginia Polytechnic Institute and State University* (**32**, 5, p. 907) Article

J94-131 Screech Tones from Free and Ducted Supersonic Jets. C. K. W. Tam, *Florida State University*; K. K. Ahuja, *Georgia Institute of Technology*; and R. R. Jones III, *Sverdrup Technology, Inc./Arnold Engineering Development Center Group* (**32**, 5, p. 917) Article based on AIAA Paper 93-0732

J94-132 Transition Correlations in Three-Dimensional Boundary Layers. Helen L. Reed and Timothy S. Haynes, *Arizona State University* (**32**, 5, p. 923) Article

J94-133 Modeling Scramjet Combustor Flowfields with a Grid Adaptation Scheme. R. Ramakrishnan and D. J. Singh, *Analytical Services & Materials, Inc.* (**32**, 5, p. 930) Article based on AIAA Paper 93-0355

J94-134 General Strong Conservation Formulation of Navier-Stokes Equations in Nonorthogonal Curvilinear Coordinates. H. Q. Yang, S. D. Habchi, and A. J. Przekwas, *CFD Research Corporation* (**32**, 5, p. 936) Article based on AIAA Paper 92-0187

J94-135 Grid Adaptation Using Chimera Composite Overlapping Meshes. Kai-Hsiung Kao and Meng-Sing Liou, *NASA Lewis Research Center*; and Chuen-Yen Chow, *University of Colorado* (**32**, 5, p. 942) Article based on AIAA Paper 93-3389 CP933

J94-136 Multigrid Convergence of an Implicit Symmetric Relaxation Scheme. Seokkwan Yoon and Dochan Kwak, *NASA Ames Research Center* (**32**, 5, p. 950) Article based on AIAA Paper 93-3357 CP933

J94-137 New Multigrid Approach for Three-Dimensional Unstructured, Adaptive Grids. Vijayan Parthasarathy and Y. Kallinderis, *University of Texas at Austin* (**32**, 5, p. 956) Article

J94-138 Monte Carlo Computation of Nonequilibrium Flow in a Hypersonic Iodine Wind Tunnel. Iain D. Boyd, *Cornell University*; and Gerald C. Pham-Van-Diep and E. Phil Muntz, *University of Southern California* (**32**, 5, p. 964) Article

J94-139 Numerical Study of Transient Flow Phenomena in Shock Tunnels. Susan Tokarcik-Polsky and Jean-Luc Cambier, *Eloret Institute* (**32**, 5, p. 971) Article based on AIAA Paper 93-2018

J94-140 Analytic Solutions for Dusty Shock Waves. Jack Pike, *England, UK* (**32**, 5, p. 979) Article

J94-141 Unique Determination of Solutions to the Burnett Equations. C. J. Lee, *University of Southern California* (**32**, 5, p. 985) Article

J94-142 Experimental Observations of the Effect of Gravity Changes on Smoldering Combustion. J. L. Torero and A. C. Fernandez-Pello, *University of California at Berkeley*; and D. Urban, *Sverdrup Technology Inc.* (**32**, 5, p. 991) Article

J94-143 Structure of Local Pressure-Driven Three-Dimensional Transient Boundary-Layer Separation. Laura L. Pauley, *Pennsylvania State University* (**32**, 5, p. 997) Article

J94-144 Reattachment Studies of an Oscillating Airfoil Dynamic Stall Flowfield. S. Ahmed, *MCAT Institute*; and M. S. Chandrasekhara, *Naval Postgraduate School* (**32**, 5, p. 1006) Article based on AIAA Paper 91-3225 CP918

J94-145 Symmetry Breaking in Vortical Flows over Cones—Theory and Numerical Experiments. Peter M. Hartwich, *ViGYAN, Inc.* (**32**, 5, p. 1013) Article based on AIAA Paper 93-3408 CP935

J94-146 Redesign of Plates by Large Admissible Perturbations. Michael M. Bernitsas and Chae Whan Rim, *University of Michigan* (**32**, 5, p. 1021) Article

J94-147 Development of Free-Edge Effect During Processing of Semicrystalline Thermoplastic Composites. Moshe M. Domb and Jorn S. Hansen, *University of Toronto, Canada* (**32**, 5, p. 1029) Article based on AIAA Paper 93-1348 CP931

J94-148 Sensitivity Analysis and Optimal Design of Thin Shells of Revolution. C. M. Mota Soares and C. A. Mota Soares, *Universidade Técnica de Lisboa, Portugal*; and J. Infante Barbosa, *Escola Náutica Infante D. Henrique, Portugal* (**32**, 5, p. 1034) Article

J94-149 Analysis of Whisker-Toughened Ceramic Components Using an Interactive Reliability Model. Stephen F. Duffy and Joseph L. Palko, *Cleveland State University* (**32**, 5, p. 1043) Article

J94-150 Structural Damage Detection of Space Truss Structures Using Best Achievable Eigenvectors. Tae W. Lim, *University of Kansas*; and Thomas A. L. Kashangaki, *NASA Langley Research Center* (**32**, 5, p. 1049) Article

J94-151 Repeatability and Uncertainty Analyses of Light Gas Gun Test Data. William P. Schonberg and David Cooper, *University of Alabama in Huntsville* (**32**, 5, p. 1058) Article

J94-152 Parallel Computing Using Semianalytical Finite Element Method. Jeong Rae Kim, Wie Dae Kim, and Seung Jo Kim, *Seoul National University, Korea* (**32**, 5, p. 1066) Article

J94-153 Artificial Neural Networks for Predicting Nonlinear Dynamic Helicopter Loads. A. B. Cook, C. R. Fuller, W. F. O'Brien, and R. H. Cabell, *Virginia Polytechnic Institute and State University* (**32**, 5, p. 1072) Article

J94-154 Explicit Kutta Condition for an Unsteady Two-Dimensional Constant Potential Panel Method. Neil Bose, *Memorial University of Newfoundland, Canada* (**32**, 5, p. 1078) Technical Note

J94-155 Three-Dimensional Closure of the Passage-Averaged Vorticity-Potential Formulation. Xudong Zhang, André Garon, and Ricardo Camarero, *École Polytechnique de Montréal, Canada* (**32**, 5, p. 1080) Technical Note

J94-156 Asymptotic Probabability Density Function of a Scalar. R. W. Derksen, *University of Manitoba, Canada*; P. J. Sullivan, *University of Western Ontario, Canada*; and H. Yip, *Department of National Defense, Canada* (**32**, 5, p. 1083) Technical Note

J94-157 Crossflow Topology of Vortical Flows. Miguel R. Visbal and Raymond E. Gordnier, *Wright Laboratory* (**32**, 5, p. 1085) Technical Note

J94-158 Asymptotic Behavior of Solutions of the Renormalization Group K-ε Turbulence Model. A. Yakhot, I. Staroselsky, and S. A. Orszag, *Cambridge Hydrodynamics, Inc.* (**32**, 5, p. 1087) Technical Note

J94-159 Precision Requirement for Potential-Based Panel Methods. James K. Nathman, *Analytical Methods Inc.* (**32**, 5, p.

1089) Technical Note

J94-160 Comparison of Finite Element and Finite Volume Methods for Incompressible Viscous Flows. K. Nakajima and Y. Kallinderis, *University of Texas at Austin* (**32**, 5, p. 1090) Technical Note

J94-161 Practical Formulation of a Positively Conservative Scheme. Shigeru Obayashi, *NASA Ames Research Center*; and Yasuhiro Wada, *NASA Lewis Re-search Center* (**32**, 5, p. 1093) Technical Note

J94-162 Numerical Investigation of Cylinder Wake Flow with a Rear Stagnation Jet. J. D. Mo and M. R. Duke Jr., *Memphis State University* (**32**, 5, p. 1095) Technical Note based on AIAA Paper 93-3274

J94-163 Surface Interference in Rayleigh Scattering Measurements near Forebodies. Zaidi B. Zakaria and Steven H. Collicott, *Purdue University* (**32**, 5, p. 1098) Technical Note

J94-164 Shear Buckling Response of Tailored Composite Plates. Sherrill B. Biggers and Stephane S. Pageau, *Clemson University* (**32**, 5, p. 1100) Technical Note based on AIAA Paper 93-1408 CP931

J94-165 Damage Detection in Framed Structures. Izhak Sheinman, *Technion—Israel Institute of Technology* (**32**, 5, p. 1103) Technical Note

J94-166 Numerical Simulation of Turbulent Cylinder Juncture Flowfields. Donald P. Rizzetta, *Wright Laboratory* (**32**, 6, p. 1113) Article based on AIAA Paper 93-3038

J94-167 Coherent Structure in a Combusting Jet in Crossflow. Rong F. Huang and Jean M. Chang, *National Taiwan Institute of Technology, ROC* (**32**, 6, p. 1120) Article

J94-168 Numerical Simulation of Vortex-Wedge Interaction. Jin-Ho Park and Duck-Joo Lee, *Korea Advanced Institute of Science and Technology, Korea* (**32**, 6, p. 1126) Article based on AIAA Paper 90-3918

J94-169 Sound Radiation and Caustic Formation from a Point Source in a Wall Shear Layer. I. David Abrahams, *Keele University, England, UK*; Gregory A. Kriegsmann, *New Jersey Institute of Technology*; and Edward L. Reiss, *Northwestern University* (**32**, 6, p. 1135) Article

J94-170 Vortex Cutting by a Blade, Part 1: General Theory and a Simple Solution. J. S. Marshall, *University of Iowa* (**32**, 6, p. 1145) Article

J94-171 Fluctuating Wall Pressures near Separation in Highly Swept Turbulent Interactions. J. D. Schmisseur, *Wright Laboratory*; and D. S. Dolling, *University of Texas at Austin* (**32**, 6, p. 1151) Article

J94-172 Time Integration Algorithms for the Two-Dimensional Euler Equations on Unstructured Meshes. David C. Slack, *AeroSoft, Inc.*; D. L. Whitaker, *Analytical Services and Materials, Inc.*; and Robert W. Walters, *Virginia Polytechnic Institute and State University* (**32**, 6, p. 1158) Article based on AIAA Paper 90-0697

J94-173 Three-Dimensional Adaptive Grid-Embedding Euler Technique. Roger L. Davis and John F. Dannenhoffer III, *United Technologies Research Center* (**32**, 6, p. 1167) Article based on AIAA Paper 93-0330

J94-174 Fast Multigrid Method for Solving Incompressible Hydrodynamic Problems with Free Surfaces. J. Farmer, L. Martinelli, and A. Jameson, *Princeton University* (**32**, 6, p. 1175) Article based on AIAA Paper 93-0767

J94-175 Edge-Based Finite Element Scheme for the Euler Equations. Hong Luo and Joseph D. Baum, *Science Applications International Corporation*; and Rainald Löhner, *George Washington University* (**32**, 6, p. 1183) Article based on AIAA Paper 93-2933

J94-176 Computation of Separated Duct Flows Using the Boundary-Layer Equations. V. I. Vasilev, *Central Institute of Aviation Motors, Russia* (**32**, 6, p. 1191) Article

J94-177 Boundary Conditions for Unsteady Supersonic Inlet Analyses. David W. Mayer and Gerald C. Paynter, *Boeing Commercial Airplane Group* (**32**, 6, p. 1200) Article

J94-178 Effect of Initial Conditions on Vortices in a Turbulent Near Wake. Y. Zhou and R. A. Antonia, *University of Newcastle, Australia* (**32**, 6, p. 1207) Article

J94-179 Two-Phase Flows: Second-Order Schemes and Boundary Conditions. Richard Saurel, Eric Daniel, and Jean Claude Loraud, *Université de Provence, France* (**32**, 6, p. 1214) Article

J94-180 Low-Dimensional Description of the Dynamics in Separated Flow past Thick Airfoils. Anil E. Deane, *NASA Goddard Space Flight Center*; and Catherine Mavriplis, *George Washington University* (**32**, 6, p. 1222) Article based on AIAA Paper 91-1622

J94-181 Role of Mixing in the Chemical Oxygen-Iodine Laser Reactions. J. A. Miller, *Air Force Institute of Technology*; and E. J. Jumper, *University of Notre Dame* (**32**, 6, p. 1228) Article based on AIAA Paper 90-0253

J94-182 Laser Interferometer Skin-Friction Measurements of Crossing-Shock-Wave/Turbulent-Boundary-Layer Interactions. T. J. Garrison and G. S. Settles, *Pennsylvania State University*; and N. Narayanswami and D. D. Knight, *Rutgers University* (**32**, 6, p. 1234) Article based on AIAA Paper 93-3072

J94-183 Aerodynamic Investigation with Focusing Schlieren in a Cryogenic Wind Tunnel. Ehud Gartenberg, *Old Dominion University*; and Leonard M. Weinstein and Edwin E. Lee Jr., *NASA Langley Research Center* (**32**, 6, p. 1242) Article based on AIAA Paper 93-3485

J94-184 Governing Equations and Finite Element Models for Multiaxial Piezoelectric Beam Sensors/Actuators. Rong C. Shieh, *MRJ, Inc.* (**32**, 6, p. 1250) Article based on AIAA Paper 93-1687 CP931

J94-185 Transverse Shear Stresses and Their Sensitivity Coefficients in Multilayered Composite Panels. Ahmed K. Noor, Yong H. Kim, and Jeanne M. Peters, *University of Virginia, NASA Langley Research Center* (**32**, 6, p. 1259) Article

J94-186 Response of Laminated Composite Plates to Low-Speed Impact by Different Impactors. Chunchu B. Prasad, *Analytical Services and Materials, Inc.*; and Damodar R. Ambur and James H. Starnes Jr., *NASA Langley Research Center* (**32**, 6, p. 1270) Article based on AIAA Paper 93-1402 CP931

J94-187 Equivalent Plate Structural Modeling for Wing Shape Optimization Including Transverse Shear. Eli Livne, *University of Washington* (**32**, 6, p. 1278) Article

J94-188 Performance and Optimization of Induced Strain Actuated Structures Under External Loading. Z. Chaudhry and C A. Rogers, *Virginia Polytechnic Institute and State University* (**32**, 6, p. 1289) Article based on AIAA Paper 93-1699 CP931

J94-189 Three-Dimensional Shape Optimization Using the Boundary Element Method. Koetsu Yamazaki, Jiro Sakamoto, and Masami Kitano, *Kanazawa University, Japan* (**32**, 6, p. 1295) Article based on AIAA Paper 93-1642 CP931

J94-190 Buckling of Imperfect, Anisotropic, Ring-Stiffened Cylinders Under Combined Loads. Robert P. Ley, *Northrop Corporation*; and Eric R. Johnson and Zafer Gürdal, *Virginia Polytechnic Institute and State University* (**32**, 6, p. 1302) Article based on AIAA Paper 92-2232 CP922

J94-191 New Successive Approximation Method for Optimum Structural Design. J. A. Snyman and Nielen Stander, *University of Pretoria, South Africa* (**32**, 6, p. 1310) Article based on AIAA Paper 93-1354 CP931

J94-192 Chemical Recombination in an Expansion Tube. Robert J. Bakos and Richard G. Morgan, *University of Queensland, Australia* (**32**, 6, p. 1316) Technical Note

J94-193 Sensitivity Derivatives for Three-Dimensional Supersonic Euler Code Using Incremental Iterative Strategy. Vamshi Mohan Korivi, Arthur C. Taylor III, and Gene W. Hou, *Old Dominion University*; and Perry A. Newman and Henry E. Jones, *NASA Langley Research Center* (**32**, 6, p. 1319) Technical Note

J94-194 Swirl Control in an S-Duct at High Angle of Attack. P. F. Weng, *Shanghai Jiao Tong University, PRC*; and R. W. Guo, *Nanjing University of Aeronautics and Astronautics, PRC* (**32**, 6, p. 1321) Technical Note

J94-195 Relationship Between Stokes Number and Intrinsic Frequencies in Particle-Laden Flows. S. K. Aggarwal, *University of Illinois at Chicago* (**32**, 6, p. 1322) Technical Note

J94-196 Geometry of Thin Liquid Sheet Flows. Donald L. Chubb and Frederick D. Calfo, *NASA Lewis Research Center*; Marc W. McConley, *Princeton University*; and Matthew S. McMaster and Abdollah A. Afjeh, *University of Toledo* (**32**, 6, p. 1325) Technical Note

J94-197 Effect of Damage on the Impact Response of Composite Laminates. Paul A. Lagace, Kiernan F. Ryan, and Michael J. Graves, *Massachusetts Institute of Technology* (**32**, 6, p. 1328) Technical Note based on AIAA Paper 91-1079 CP911

J94-198 Structural Damage Detection Using Active Members and Neural Networks. R. A. Manning, *TRW Space and Electronics Group* (**32**, 6, p. 1331) Technical Note

J94-199 Optimal Fail-Safe Design of Elastoplastic Structures. Avigdor Shechter, *Israel* (**32**, 6, p. 1333) Technical Note

J94-200 Thermal Postbuckling Behavior of Laminated Composite Plates. Gajbir Singh and G. Venkateswara Rao, *Vikram Sarabhai Space Centre, India*; and N. G. R. Iyengar, *Indian Institute of Technology* (**32**, 6, p. 1336) Technical Note

J94-201 Disturbance Generation in Supersonic Jets Under Acoustic Excitation. V. G. Pimshtein, *Central Aerohydrodynamic Institute, Russia* (**32**, 7, p. 1345) Article

J94-202 Rotating Kirchhoff Method for Three-Dimensional Transonic Blade-Vortex Interaction Hover Noise. Yu Xue and A. S. Lyrintzis, *University of Minnesota* (**32**, 7, p. 1350) Article

J94-203 Computing Unsteady Shock Waves for Aeroacoustic Applications. Kristine R. Meadows, *NASA Langley Research Center*; David A. Caughey, *Cornell University*; and Jay Casper, *ViGYAN, Inc.* (**32**, 7, p. 1360) Article

J94-204 Control-Nonlinear-Nonstationary Structural Response and Radiation near a Supersonic Jet. Lucio Maestrello, *NASA Langley Research Center* (**32**, 7, p. 1367) Article based on AIAA Paper 93-4338

J94-205 Supersonic and Hypersonic Shock/Boundary-Layer Interaction Database. Gary S. Settles and Lori J. Dodson, *Pennsylvania State University* (**32**, 7, p. 1377) Article based on AIAA Paper 91-1763

J94-206 Linear Disturbances in Hypersonic, Chemically Reacting Shock Layers. Greg Stuckert and Helen L. Reed, *Arizona State University* (**32**, 7, p. 1384) Article

J94-207 Behavior of the Johnson-King Turbulence Model in Axisymmetric Supersonic Flows. Yasuo Noguchi, *University of Salford, England, UK*; and Toshimasa Shiratori, *Tokyo Metropolitan Institute of Technology, Japan* (**32**, 7, p. 1394) Article based on AIAA Paper 93-3032

J94-208 Direct Simulation Monte Carlo and Navier-Stokes Simulations of Blunt Body Wake Flows. James N. Moss and Robert A. Mitcheltree, *NASA Langley Research Center*; Virendra K. Dogra, *ViGYAN, Inc.*; and Richard G. Wilmoth, *NASA Langley Research Center* (**32**, 7, p. 1399) Article based on AIAA Paper 93-2807

J94-209 Probability Density Function Approach for Compressible Turbulent Reacting Flows. A. T. Hsu, Y.-L. P. Tsai, and M. S. Raju, *Sverdrup Technology, Inc.* (**32**, 7, p. 1407) Article based on AIAA Paper 93-0078

J94-210 Modeling Three-Dimensional Gas-Turbine Combustor Model Flow Using Second-Moment Closure. C. A. Lin and C. M. Lu, *National Tsing Hua University, Taiwan, ROC* (**32**, 7, p. 1416) Article based on AIAA Paper 93-3104

J94-211 Separation Prevention as an Indirect Problem Based on the Triple-Deck Theory. Tarek M. A. El-Mistikawy, *Cairo University, Egypt* (**32**, 7, p. 1423) Article

J94-212 Vortex Cutting by a Blade, Part II: Computations of Vortex Response. J. S. Marshall, *University of Iowa*; and R. Yalamanchili, *Florida Atlantic University* (**32**, 7, p. 1428) Article

J94-213 Elliptic Tip Effects on the Vortex Wake of an Axisymmetric Body at Incidence. David H. Bridges, *Mississippi State University*; and Hans G. Hornung, *California Institute of Technology* (**32**, 7, p. 1437) Article based on AIAA Paper 93-2960

J94-214 Navier-Stokes Simulations of Slender Axisymmetric Shapes in Supersonic, Turbulent Flow. Kenneth J. Moran and Philip S. Beran, *Air Force Institute of Technology* (**32**, 7, p. 1446) Article

J94-215 Planar Air Density Measurements near Model Surfaces by Ultraviolet Rayleigh/Raman Scattering. G. Grünefeld and V. Beushausen, *Laser-Laboratorium Göttingen, Germany*; and P. Andresen, *University of Bielefeld, Germany* (**32**, 7, p. 1457) Article

J94-216 Response of Hot-Element Wall Shear Stress Gages in Unsteady Turbulent Flows. W. J. Cook, *Iowa State University* (**32**, 7, p. 1464) Article based on AIAA Paper 91-0167

J94-217 Aeroelastic Stability of Hingeless Rotor Blade in Hover Using Large Deflection Theory. Maeng Hyo Cho and In Lee, *Korea Advanced Institute of Science and Technology* (**32**, 7, p. 1472) Article

J94-218 Interlaminar Tension Strength of Graphite/Epoxy Composite Laminates. Kunigal N. Shivakumar, Harold G. Allen, and Vishnu S. Avva, *North Carolina A&T State University* (**32**, 7, p. 1478) Article

J94-219 Updating of Finite Element Models Using Vibration Tests. P. Ladeveze, D. Nedjar, and M. Reynier, *ENS de Cachan/CNES, France* (**32**, 7, p. 1485) Article

J94-220 Stability of Magnetic Bearing-Rotor Systems and the Effects of Gravity and Damping. P. Zhong and M. A. Townsend, *University of Virginia* (**32**, 7, p. 1492) Article

J94-221 Modal Expansion Method for Eigensensitivity with Repeated Roots. Michael L. Bernard and Allen J. Bronowicki, *TRW Space and Electronics Group* (**32**, 7, p. 1500) Article

J94-222 Thermomechanical Buckling of Multilayered Composite Panels with Cutouts. Ahmed K. Noor, James H. Starnes Jr., and Jeanne M. Peters, *NASA Langley Research Center* (**32**, 7, p. 1507) Article

J94-223 Local Buckling of Honeycomb Sandwich Plates Under Action of Transverse Shear Forces. Guangyu Shi and Pin Tong, *Hong Kong University of Science & Technology* (**32**, 7, p. 1520) Article

J94-224 Lift Analysis of a Variable Camber Foil Using the Discrete Vortex-Blob Method. B. J. Maclean and R. A. Decker, *University of Utah* (**32**, 7, p. 1525) Technical Note

J94-225 Design and Operation of a Supersonic Annular Flow Facility. K. E. Williams and F. B. Gessner, *University of Washington*; and G. J. Harloff, *Sverdrup Technology, Inc.* (**32**, 7, p. 1528) Technical Note based on AIAA Paper 93-3123

J94-226 Model for Compressible Turbulence in Hypersonic Wall Boundary and High-Speed Mixing Layers. Rodney D. W. Bowersox, *Air Force Institute of Technology*; and Joseph A. Schetz, *Virginia Polytechnic University and State University* (**32**, 7, p. 1531) Technical Note based on AIAA Paper 93-2904

J94-227 Penetration and Mixing of Gas Jets in Supersonic Cross Flow. F. S. Billig and J. A. Schetz, *Johns Hopkins University* (**32**, 7, p. 1533) Technical Note based on AIAA Paper 92-5061

J94-228 Impingement of Supersonic Jets on an Axisymmetric Deflector. J. K. Prasad and R. C. Mehta, *Vikram Sarabhai Space Centre, India*; and A. K. Sreekanth, *Indian Institute of Technology* (**32**, 7, p. 1535) Technical Note

J94-229 Solution of Keller's Box Equations for Direct and Inverse Boundary-Layer Problems. Tarek M. A. El-Mistikawy, *Cairo University, Egypt* (**32**, 7, p. 1538) Technical Note

J94-230 Derivation of a Modified Hybrid Approximation. Thomas M. Harms, Theodor W. von Backström, J. Prieur du Plessis, and Louwrens M. Toerien, *University of Stellenbosch, South Africa* (**32**, 7, p. 1541) Technical Note

J94-231 Approximations for Weak and Strong Oblique Shock Wave Angles. Anthony M. Agnone, *Hofstra University* (**32**, 7, p. 1543) Technical Note

J94-232 Adaptive Computations of Flow Around a Delta Wing with Vortex Breakdown. David L. Modiano and Earll M. Murman, *Massachusetts Institute of Technology* (**32**, 7, p. 1545) Technical Note based on AIAA Paper 93-3400 CP935

J94-233 Numerical Computations of Supersonic Base Flow with Special Emphasis on Turbulence Modeling. Jubaraj Sahu, *U.S. Army Research Laboratory* (**32**, 7, p. 1547) Technical Note based on AIAA Paper 92-4352

J94-234 Demonstration of an Elastically Coupled Twist Control Concept for Tilt Rotor Blade Application. R. C. Lake, M. W. Nixon, M. L. Wilbur, J. D. Singleton, and P. H. Mirick, *NASA Langley Research Center* (**32**, 7, p. 1549) Technical Note based on AIAA Paper 92-2468

J94-235 Contribution of the Truncated Modes to Eigenvector Derivatives. Zhong-sheng Liu, *Peking University, PRC*; Su-huan Chen, *Jilin University of Technology, PRC*; Min Yu, *Peking University, PRC*; and You-qun Zhao, *Jilin University of Technology, PRC* (**32**, 7, p. 1551) Technical Note

J94-236 Investigation of the Interaction of a Blast Wave with an Internal Structure. Frank Marconi, *Grumman Corporation* (**32**, 8, p. 1561) Article based on AIAA Paper 93-3085

J94-237 Onset of Vortex Breakdown Above a Pitching Delta Wing. Miguel R. Visbal, *Wright Laboratory* (**32**, 8, p. 1568) Article

J94-238 Measurement of Surface Shear Stress Vectors Using Liquid Crystal Coatings. Daniel C. Reda and Joseph J. Muratore Jr., *NASA Ames Research Center* (**32**, 8, p. 1576) Article based on AIAA Paper 94-0729

J94-239 Control of High-Speed Impinging-Jet Resonance. Mark Sheplak and Eric F. Spina, *Syracuse University* (**32**, 8, p. 1583) Article based on AIAA Paper 93-0733

J94-240 Staggered Finite Volume Scheme for Solving Cascade Flow with a k-ω Turbulence Model. Fieng Liu and Xiaoqing Zheng, *University of California, Irvine* (**32**, 8, p. 1589) Article based on AIAA Paper 93-1912

J94-241 Two-Equation Eddy-Viscosity Turbulence Models for Engineering Applications. F. R. Menter, *NASA Ames Research Center* (**32**, 8, p. 1598) Article based on AIAA Paper 93-2906

J94-242 Application of Essentially Nonoscillatory Schemes to Unsteady Hypersonic Shock-Shock Interference Heating Problems. Xiaolin Zhong, *University of California, Los Angeles* (**32**, 8, p. 1606) Article based on AIAA Paper 93-0879

J94-243 Finite Element Method for Incompressible Viscous Flows with Adaptive Hybrid Grids. Y. Kallinderis and K.

Nakajima, *University of Texas at Austin* (**32**, 8, p. 1617) Article

J94-244 Three-Dimensional Unstructured Adaptive Multigrid Scheme for the Euler Equations. Stuart D. Connell and D. Graham Holmes, *General Electric Research and Development Center* (**32**, 8, p. 1626) Article based on AIAA Paper 93-3339

J94-245 Measurements of Kelvin-Helmholtz Instabilities in a Supersonic Shear Layer. Steve Martens, Kevin W. Kinzie, and Dennis K. McLaughlin, *Pennsylvania State University* (**32**, 8, p. 1633) Article based on AIAA Paper 92-0177

J94-246 Atomization Experiments in a Coaxial Coflowing Mach 1.5 Flow. Kakkattukuzhy Issac, Azzedine Missoum, James Drallmeier, and Andrew Johnston, *University of Missouri—Rolla* (**32**, 8, p. 1640) Article

J94-247 Suppression of Dynamic-Stall Vortices over Pitching Airfoils by Leading-Edge Suction. M. Ahsanul Karim and Mukund Acharya, *Illinois Institute of Technology* (**32**, 8, p. 1647) Article based on AIAA Paper 93-3267

J94-248 Effect of Orifice Flow and Heat Transfer on Gas Spring Hysteresis. Harold Mirels, *The Aerospace Corporation* (**32**, 8, p. 1656) Article

J94-249 Linearized Theory for Pulse Tube Cryocooler Performance. Harold Mirels, *The Aerospace Corporation* (**32**, 8, p. 1662) Article

J94-250 Collisional Quenching Corrections for Laser-Induced Fluorescence Measurements of NO $A^2\Sigma^+$. P. H. Paul, J. A. Gray, and J. L. Durant Jr., *Sandia National Laboratories*; and J. W. Thoman Jr., *Williams College* (**32**, 8, p. 1670) Article

J94-251 Velocity Field Imaging in Supersonic Reacting Flows near Atmospheric Pressure. M. Allen, S. Davis, W. Kessler, H. Legner, K. McManus, P. Mulhall, T. Parker, and D. Sonnenfroh, *Physical Sciences Inc.* (**32**, 8, p. 1676) Article based on AIAA Paper 93-2032

J94-252 Noise Reduction Properties of a Multiple-Source Schlieren System. Steven H. Collicott and Terry Ray Salyer, *Purdue University* (**32**, 8, p. 1683) Article based on AIAA Paper 93-2917

J94-253 Intelligent Structures for Aerospace: A Technology Overview and Assessment. Edward F. Crawley, *Massachusetts Institute of Technology* (**32**, 8, p. 1689) Survey Paper

J94-254 Interlaminar Stresses in Composite Laminates Under Out-of-Plane Shear/Bending. Taehyoun Kim and Satya N. Atluri, *Georgia Institute of Technology* (**32**, 8, p. 1700) Article

J94-255 New Higher Order Plate Theory in Modeling Delamination Buckling of Composite Laminates. Aditi Chattopadhyay and Haozhong Gu, *Arizona State University* (**32**, 8, p. 1709) Article

J94-256 Computational Methods for Efficient Structural Reliability and Reliability Sensitivity Analysis. Y.-T. Wu, *Southwest Research Institute* (**32**, 8, p. 1717) Article based on AIAA Paper 93-1626

J94-257 Numerical Computation of Wave Localization in Large Disordered Beam-Like Lattice Trusses. Wei-Chau Xie and S. T. Ariaratnam, *University of Waterloo, Canada* (**32**, 8, p. 1724) Article

J94-258 High-Resolution Navier-Stokes Computation of Vortical Flow over a Supersonic Delta Wing. C. H. Tai, C. Y. Soong, and S. L. Yin, *Chung Cheng Institute of Technology, Taiwan, ROC* (**32**, 8, p. 1733) Technical Note

J94-259 Unstructured Viscous Grid Generation by the Advancing-Layers Method. Shahyar Pirzadeh, *ViGYAN, Inc.* (**32**, 8, p. 1735) Technical Note based on AIAA Paper 93-3453

J94-260 Influence of Impingement Edge Geometry on Cavity Flow Oscillations. J. C. F. Pereira and J. M. M. Sousa, *Instituto Superior Técnico, Portugal* (**32**, 8, p. 1737) Technical Note

J94-261 Comparative Study of Higher Order Turbulence Models for Compressible Separated Flows. C. C. Chuang and C. C. Chieng, *National Tsing Hua University, Taiwan, ROC* (**32**, 8, p. 1740) Technical Note

J94-262 Effect of Isotropy of Actuation Strains for a Plate with a Hole. Mohammed H. Kadivar, K. Pradeep Sensharma, and Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (**32**, 8, p. 1743) Technical Note

J94-263 Interactive Control of Turbulent Boundary Layers: A Futuristic Overview. Mohamed Gad-el-Hak, *University of Notre Dame* (**32**, 9, p. 1753) Survey Paper based on AIAA Paper 93-3268

J94-264 Direct Calculations of Waves in Fluid Flows Using High-Order Compact Difference Scheme. Sheng-Tao Yu, *Sverdrup Technology, Inc.*; and Lennart S. Hultgren and Nan-Suey Liu, *NASA Lewis Research Center* (**32**, 9, p. 1766) Article based on AIAA Paper 93-0148

J94-265 Turbulent Mixing Noise from Supersonic Jets. Christopher K. W. Tam and Ping Chen, *Florida State University* (**32**, 9, p. 1774) Article based on AIAA Paper 93-4408

J94-266 Turbulent Drag Reduction Mechanism Above a Riblet Surface. Yuji Suzuki and Nobuhide Kasagi, *University of Tokyo, Japan* (**32**, 9, p. 1781) Article based on AIAA Paper 93-3257

J94-267 Comparison of Coordinate-Invariant and Coordinate-Aligned Upwinding for the Euler Equations. Peter M. Hartwich, *ViGYAN, Inc.* (**32**, 9, p. 1791) Article based on AIAA Paper 93-3306 CP933

J94-268 Unified Parallel Algorithm for Grid Adaptation on a Multiple-Instruction Multiple-Data Architecture. A. Vidwans and Y. Kallinderis, *University of Texas at Austin* (**32**, 9, p. 1800) Article

J94-269 Implicit Multiblock Euler and Navier-Stokes Calculations. Carl B. Jenssen, *SINTEF, Norway* (**32**, 9, p. 1808) Article based on AIAA Paper 94-0521

J94-270 Hypersonic, Turbulent Viscous Interaction past an Expansion Corner. Behzad Bigdeli and Frank K. Lu, *University of Texas at Arlington* (**32**, 9, p. 1815) Article based on AIAA Paper 93-2985

J94-271 Validation Procedure for the Analysis of Shock-Wave/Boundary-Layer Interaction Problems. F. Grasso, *University of Rome "La Sapienza", Italy*; G. Leone, *CIRA, Italy*; and J. M. Delery, *ONERA, France* (**32**, 9, p. 1820) Article

J94-272 Computation of Axisymmetric and Ionized Hypersonic Flows Using Particle and Continuum Methods. Iain D. Boyd, *Cornell University*; and Tahir Gökçen, *Eloret Institute* (**32**, 9, p. 1828) Article

J94-273 Numerical Investigation of Separated Nozzle Flows. C. L. Chen and S. R. Chakravarthy, *Rockwell International Science Center*; and C. M. Hung, *NASA Ames Research Center* (**32**, 9, p. 1836) Article

J94-274 Velocity Measurements in Turbulent Bluff-Body Stabilized Flows. R. W. Schefer, *Sandia National Laboratories*; and M. Namazian and J. Kelly, *Altex Technologies Corporation* (**32**, 9, p. 1844) Article

J94-275 Vortical and Turbulent Structure of a Lobed Mixer Free Shear Layer. D. C. McCormick, *United Technologies Research Center*; and J. C. Bennett Jr., *University of Connecticut* (**32**, 9, p. 1852) Article based on AIAA Paper 93-0219

J94-276 Experimental and Numerical Study of Swept Ramp Injection into a Supersonic Flowfield. James M. Donohue, James C. McDaniel Jr., and Hossein Haj-Hariri, *University of Virginia* (**32**, 9, p. 1860) Article based on AIAA Paper 93-2445

J94-277 Visualized Flow Patterns of Double Concentric Jets at Low Annulus Velocities. Rong F. Huang and Chih L. Lin, *National Taiwan Institute of Technology* (**32**, 9, p. 1868) Article

J94-278 Boundary-Layer Transition Detection with Infrared Imaging Emphasizing Cryogenic Applications. Ehud Gartenberg, *Old Dominion University*; and Robert E. Wright, *NASA Langley Research Center* (**32**, 9, p. 1875) Article

J94-279 Laser Doppler Anemometry Data Simulation: Application to Investigate the Accuracy of Statistical Estimators. W. Fuchs and H. Nobach, *University of Rostock, Germany*; and C. Tropea, *University of Erlangen-Nuremberg, Germany* (**32**, 9, p. 1883) Article

J94-280 Pressure Loss Modulus Correlation for Δp Across Uniformly Distributed-Loss Devices. Gregory J. Nunz, *California Institute of Technology* (**32**, 9, p. 1890) Article based on AIAA Paper 93-3474 CP935

J94-281 Static Shape Control for Adaptive Wings. Fred Austin, Michael J. Rossi, William Van Nostrand, and Gareth Knowles, *Grumman Corporate Research Center*; and Antony Jameson, *Princeton University* (**32**, 9, p. 1895) Article

J94-282 Passive Spatial Confinement of Impulsive Responses in Coupled Nonlinear Beams. Alexander F. Vakakis, *University of Illinois* (**32**, 9, p. 1902) Article

J94-283 Theory and Method of Structural Variations of Finite Element Systems. Ting-Yu Rong, *Old Dominion University*; and An-Qi Lü, *Southwest Jiaotong University, PRC* (**32**, 9, p. 1911) Article based on AIAA Paper 92-2356 922

J94-284 Significance of Shock Structure on Supersonic Jet Mixing Noise of Axisymmetric Nozzles. Chan M. Kim and Eugene A. Krejsa, *NASA Lewis Research Center*; and Abbas Khavaran, *NYMA, Lewis Research Group* (**32**, 9, p. 1920) Technical Note based on AIAA Paper 93-0735

J94-285 Diverging Solutions of the Boundary-Layer Equations near a Plane of Symmetry. Hans Thomann, *Swiss Federal Institute of Technology* (**32**, 9, p. 1923) Technical Note

J94-286 Performance of the κ-ε Model in Computation of Asymmetric Turbulent Near Wakes. S. Vengadesan and A. Nakayama, *Kobe University, Japan* (**32**, 9, p. 1925) Technical Note

J94-287 Time-Accurate Local Time Stepping Method Based on Flux Updating. X. D. Zhang, J.-Y. Trépanier, M. Reggio, and R. Camarero, *École Polytechnique de Montréal, Canada* (**32**, 9, p. 1926) Technical Note based on AIAA Paper 94-0525

J94-288 Turbulent Flow Measurements with a Triple-Split Hot-Film Probe. M. D. Doiron and D. W. Zingg, *University of Toronto, Canada* (**32**, 9, p. 1929) Technical Note

J94-289 Nonlinear Thermal Dynamic Analysis of Graphite/Aluminum Composite Plates. R. Tenneti and K. Chandrashekhara, *University of Missouri—Rolla* (**32**, 9, p. 1931) Technical Note

J94-290 Hierarchy in the Design and Development of Structural Components: A Preliminary Study. A. V. Srinivasan, *University of Connecticut*; and B. N. Cassenti, *United Technologies Research Center* (**32**, 9, p. 1933) Technical Note

J94-291 Some Nonlinear Response Characteristics of Collapsing Composite Shells. James M. Greer Jr. and Anthony N. Palazotto, *Air Force Institute of Technology* (**32**, 9, p. 1935) Technical Note based on AIAA Paper 93-1374 CP931

J94-292 Comparison of NO and OH Planar Fluorescence Temperature Measurements in Scramjet Model Flowfields. B. K. McMillin, J. M. Seitzman, and R. K. Hanson, *Stanford University* (**32**, 10, p. 1945) Article based on AIAA Paper 93-2035

J94-293 Active Control of Wake/Blade-Row Interaction Noise. Kenneth A. Kousen and Joseph M. Verdon, *United Technologies Research Center* (**32**, 10, p. 1953) Article based on AIAA Paper 93-4351

J94-294 Projection Method for Viscous Incompressible Flow on Quadrilateral Grids. John B. Bell, *Lawrence Livermore National Laboratory*; and Jay M. Solomon and William G. Szymczak, *Naval Surface Warfare Center* (**32**, 10, p. 1961) Article

J94-295 Comparison of Two Formulations for High-Order Accurate Essentially Nonoscillatory Schemes. Jay Casper, *ViGYAN, Inc.*; Chi-Wang Shu, *Brown University*; and H. Atkins, *NASA Langley Research Center* (**32**, 10, p. 1970) Article based on AIAA Paper 93-3338 CP933

J94-296 Comparison of Two Methods for Solving Three-Dimensional Unsteady Compressible Viscous Flows. Ray Hixon, Fu-Lin Tsung, and L. N. Sankar, *Georgia Institute of Technology* (**32**, 10, p. 1978) Article based on AIAA Paper 93-0537

J94-297 Parallel Implicit Unstructured Grid Euler Solvers. V. Venkatakrishnan, *Institute for Computer Applications in Science and Engineering* (**32**, 10, p. 1985) Article based on AIAA Paper 94-0759

J94-298 Role of Splitter Plates in Modifying Cylinder Wake Flows. M. A. Z. Hasan and M. O. Budair, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**32**, 10, p. 1992) Article

J94-299 Asymmetric Vortex Pair in the Wake of a Circular Cylinder. G. Iosilevskii and A. Seginer, *Technion—Israel Institute of Technology* (**32**, 10, p. 1999) Article

J94-300 Particle Dispersion in a Transitional Axisymmetric

Jet: A Numerical Simulation. J. Uthuppan and S. K. Aggarwal, *University of Illinois*; and F. F. Grinstein and K. Kailasanath, *Naval Research Laboratory* (**32**, 10, p. 2004) Article

J94-301 Unsteady Supersonic Cavity Flow Simulations Using Coupled k-ε and Navier-Stokes Equations. S. H. Shih, A. Hamed, and J. J. Yeuan, *University of Cincinnati* (**32**, 10, p. 2015) Article based on AIAA Paper 93-3031

J94-302 Interaction of a Streamwise Vortex with a Thin Plate: A Source of Turbulent Buffeting. Alejandro Mayori and Donald Rockwell, *Lehigh University* (**32**, 10, p. 2022) Article

J94-303 Experimental Investigation of Fringe Divergence Errors in Laser Velocimetry Measurements. Gary A. Fleming, *ViGYAN, Inc.*; John M. Kuhlman, *West Virginia University* (**32**, 10, p. 2030) Article based on AIAA Paper 94-0043

J94-304 Bilinear Formulation Applied to the Response and Stability of Helicopter Rotor Blade. Grzegorz Kawiecki, *University of Tennessee*; and Nithiam Ti Sivaneri, *West Virginia University* (**32**, 10, p. 2036) Article

J94-305 Finite Element Time Domain—Modal Formulation for Nonlinear Flutter of Composite Panels. R. C. Zhou, David Y. Xue, and Chuh Mei, *Old Dominion University* (**32**, 10, p. 2044) Article based on AIAA Paper 94-1424

J94-306 Integrated Structural Design and Vibration Suppression Using Independent Modal Space Control. Robert A. Canfield, *Air Force Institute of Technology*; and Leonard Meirovitch, *Virginia Polytechnic Institute and State University* (**32**, 10, p. 2053) Article based on AIAA Paper 93-1670 CP931

J94-307 Stationary Natural Frequencies and Mode Shapes of Composite Laminates. Xiangzhou Zhang, *Northwestern Polytechnical University, PRC*; and Norio Hasebe, *Nagoya Institute of Technology, Japan* (**32**, 10, p. 2061) Article

J94-308 New Approach for Simple Prediction of Impact Force History on Composite Laminates. I. H. Choi, *Korea Aerospace Research Institute*; and C. S. Hong, *Korea Advanced Institute of Science and Technology* (**32**, 10, p. 2067) Article

J94-309 Probability Approach for Prediction of Corrosion and Corrosion Fatigue Life. D. Gary Harlow and Robert P. Wei, *Lehigh University* (**32**, 10, p. 2073) Article

J94-310 Three-Dimensional Elasticity Solutions to Vibration of Cantilevered Skewed Trapezoids. K. M. Liew, K. C. Hung, and M. K. Lim, *Nanyang Technological University, Singapore* (**32**, 10, p. 2080) Article

J94-311 Optimal Design of Frame Structures Using Multivariate Spline Approximation. Liping Wang and Ramana V. Grandhi, *Wright State University* (**32**, 10, p. 2090) Article

J94-312 Continuum Approach for Second-Order Shape Design Sensitivity of Three-Dimensional Elastic Solids. Chin-Jung Chen and Kyung K. Choi, *University of Iowa* (**32**, 10, p. 2099) Article

J94-313 Entrainment and Acoustic Variations in a Round Jet from Introduced Streamwise Vorticity. P. Surks and C. B. Rogers, *Tufts University*; and D. E. Parekh, *McDonnell Douglas Research Laboratories* (**32**, 10, p. 2108) Technical Note

J94-314 Van Driest Transformation and Compressible Wall-Bounded Flows. P. G. Huang, *Eloret Institute*; and G. N. Coleman, *NASA Ames Research Center* (**32**, 10, p. 2110) Technical Note

J94-315 Assessment of Second-Order Closure Models in Turbulent Shear Flows. Charles G. Speziale, *Boston University*; and Thomas B. Gatski, *NASA Langley Research Center* (**32**, 10, p. 2113) Technical Note

J94-316 Zones in Coflowing Planar Inviscid Supersonic Twin Streams. Himanshu Agrawal and E. Rathakrishnan, *Indian Institute of Technology* (**32**, 10, p. 2115) Technical Note

J94-317 Suppression of Vortex Asymmetry and Side Force on a Circular Cone. A. Asghar, W. H. Stahl, and M. Mahmood, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (**32**, 10, p. 2117) Technical Note based on AIAA Paper 94-0508

J94-318 Numerical Implementation of a Modified Liou-Steffen Upwind Scheme. Jack R. Edwards, *North Carolina Agricultural and Technical State University* (**32**, 10, p. 2120) Technical Note

J94-319 Fuzzy Controller and Neuron Models of Harten's Second-Order Total Variation Diminishing Scheme. Quinn Smithwick and Scott Eberhardt, *University of Washington* (**32**, 10, p. 2122) Technical Note

J94-320 Application of Singular Value Decomposition to Direct Matrix Update Method. Wai Ming To, *Hong Kong University of Science and Technology* (**32**, 10, p. 2124) Technical Note

J94-321 Space Shuttle Main Engine Sensor Modeling Using Vector Quantization. Timothy F. Doniere and Atam P. Dhawan, *University of Cincinnati* (**32**, 10, p. 2126) Technical Note

J94-322 Simplified Analysis of General Instability of Stiffened Shells with Cutouts in Pure Bending. Dimitris L. Karabalis, *University of South Carolina* (**32**, 10, p. 2128) Technical Note

J94-323 Use of Mode Localization in Passive Control of Structural Buckling. Ali H. Nayfeh and Muhammad A. Hawwa, *Virginia Polytechnic Institute and State University* (**32**, 10, p. 2131) Technical Note based on AIAA Paper 94-1584

J94-324 Aerodynamic Shape Optimization Using Preconditioned Conjugate Gradient Methods. Greg W. Burgreen and Oktay Baysal, *Old Dominion University* (**32**, 11, p. 2145) Article based on AIAA Paper 93-3322 CP933

J94-325 Mean Flow Study of Two-Dimensional Subsonic Turbulent Boundary Layers. Fariboz Motallebi, *Delft University of Technology, The Netherlands* (**32**, 11, p. 2153) Article

J94-326 Logarithmic Laws for Compressible Turbulent Boundary Layers. R. M. C. So and H. S. Zhang, *Arizona State University*; T. B. Gatski, *NASA Langley Research Center*; and C. G. Speziale, *Boston University* (**32**, 11, p. 2162) Article

J94-327 Effects of Expansions on a Supersonic Boundary Layer: Surface Pressure Measurements. Jonathan A. Dawson, Mo Samimy, and Stephen A. Arnette, *Ohio State University* (**32**, 11, p. 2169) Article

J94-328 Laplace Interaction Law for the Computation of Viscous Airfoil Flow in Low- and High-Speed Aerodynamics. F. Arnold, *Deutsche Aerospace Airbus GmbH, Germany*; and F.

Thiele, *Technical University Berlin, Germany* (**32**, 11, p. 2178) Article based on AIAA Paper 93-3462 CP935

J94-329 Adaptive Finite Element Method for Turbulent Flow near a Propeller. Dominique Pelletier, Florin Ilinca, and Jean-François Hétu, *CERCA and Ecole Polytechnique de Montréal, Canada* (**32**, 11, p. 2186) Article based on AIAA Paper 93-2767

J94-330 Prediction of Turbulent Flow Through a Transition Duct Using a Second-Moment Closure. F. Sotiropoulos and V. C. Patel, *University of Iowa* (**32**, 11, p. 2194) Article based on AIAA Paper 93-3030

J94-331 Main Features of Overexpanded Triple Jets. Gamal H. Moustafa, *Menoufia University, Egypt* (**32**, 11, p. 2205) Article

J94-332 Simulation of Turbulent Fluctuations. Giovanni Mengali and Marco Micheli, *University of Pisa, Italy* (**32**, 11, p. 2210) Article

J94-333 Droplet Dispersion and Ejection Processes in Two-Phase Boundary Layer. M. R. Wang and D. Y. Huang, *National Cheng Kung University, Taiwan, ROC* (**32**, 11, p. 2217) Article

J94-334 Rotor-Rotor Interaction for Counter-Rotating Fans, Part 1: Three-Dimensional Flowfield Measurements. Hyoun-Woo Shin, Charlotte E. Whitfield, and David C. Wisler, *General Electric Aircraft Engines* (**32**, 11, p. 2224) Article based on AIAA Paper 93-1848

J94-335 Flow Structure in the Wake of a Wishbone Vortex Generator. B. J. Wendt and W. R. Hingst, *NASA Lewis Research Center* (**32**, 11, p. 2234) Article based on AIAA Paper 94-0620

J94-336 Finite Element for Composite Plate Bending Based on Efficient Higher Order Theory. Maenghyo Cho and Reid Parmerter, *University of Washington* (**32**, 11, p. 2241) Article based on AIAA Paper 92-2355 CP922

J94-337 Mechanical System Reliability and Risk Assessment. T. A. Cruse, S. Mahadevan, Q. Huang, and S. Mehta, *Vanderbilt University* (**32**, 11, p. 2249) Article

J94-338 Growth of Multiple Cracks and Their Linkup in a Fuselage Lap Joint. Ripudaman Singh, Jai H. Park, and Satya N. Atluri, *Georgia Institute of Technology* (**32**, 11, p. 2260) Article

J94-339 Numerical Statistical Investigation on the Dynamics of Finitely Long, Nearly Periodic Chains. Philip D. Cha and Charles R. Morganti, *Harvey Mudd College* (**32**, 11, p. 2269) Article

J94-340 Multiple Degree-of-Freedom Force-State Component Identification. Brett P. Masters and Edward F. Crawley, *Massachusetts Institute of Technology* (**32**, 11, p. 2276) Article

J94-341 Analysis and Test Correlation of Spacecraft Structures Using Dynamic Parameter Sensitivities. Srinivas Kodiyalam and Pi-Jen Kao, *General Electric Corporate Research and Development Center*; and George Wang, *Martin Marietta Astro Space* (**32**, 11, p. 2286) Article based on AIAA Paper 94-1502

J94-342 Shear and Compression Buckling Analysis for Anisotropic Panels with Elliptical Cutouts. V. O. Britt, *NASA Langley Research Center* (**32**, 11, p. 2293) Article based on AIAA Paper 93-1565 CP931

J94-343 Free Vibration and Buckling of Symmetric Cross-Ply Rectangular Laminates. S. D. Yu, W. L. Cleghorn, and R. G. Fenton, *University of Toronto, Canada* (**32**, 11, p. 2300) Article

J94-344 Buckling of Elastoplastic Circular Cylindrical Shells Under Axial Compression. M. C. Lin and M. K. Yeh, *National Tsing Hua University, Taiwan, ROC* (**32**, 11, p. 2309) Article

J94-345 Two-Equation Turbulence Model for Unsteady Separated Flows Around Airfoils. G. Jin and M. Braza, *Institut de Mécanique des Fluides de Toulouse, France* (**32**, 11, p. 2316) Technical Note

J94-346 Experimental Investigation of High-Speed Twin Jets. Gamal H. Moustafa, *Menoufia University, Egypt* (**32**, 11, p. 2320) Technical Note

J94-347 Implementing the Relaxation Damping of Air into the Navier-Stokes Equation. Oskar Bschorr, *Daimler-Benz AG, Germany* (**32**, 11, p. 2323) Technical Note

J94-348 Time-of-Flight Mass Spectrometer for Impulse Facilities. K. A. Skinner and R. J. Stalker, *University of Queensland, Australia* (**32**, 11, p. 2325) Technical Note

J94-349 Lamination Parameters for Reissner-Mindlin Plates. Joachim L. Grenestedt, *Royal Institute of Technology, Sweden* (**32**, 11, p. 2328) Technical Note

J94-350 Efficient Sensitivity Analysis for Rotary-Wing Aeromechanical Problems. Anne Marie Spence and Roberto Celi, *University of Maryland* (**32**, 12, p. 2337) Article based on AIAA Paper 93-1648 CP931

J94-351 Mach Wave Emission from a High-Temperature Supersonic Jet. John M.Steiner, *NASA Langley Research Center*; Thonse R. S. Bhat, *Old Dominion University*; and Michael K. Ponton, *NASA Langley Research Center* (**32**, 12, p. 2345) Article based on AIAA Paper 93-0734

J94-352 Coupled FEM-BEM Approach for Mean Flow Effects on Vibro-Acoustic Behavior of Planar Structures. Franck Sgard, Noureddine Atalla, and Jean Nicolas, *University of Sherbrooke, Canada* (**32**, 12, p. 2351) Article

J94-353 Computation of Oscillating Airfoil Flows with One- and Two-Equation Turbulence Models. J. A. Ekaterinaris, *Navy–NASA Joint Institute of Aeronautics*; and F. R. Menter, *Eloret Institute* (**32**, 12, p. 2359) Article based on AIAA Paper 94-0190

J94-354 Analytical Study of the Neutral Stability of a Model Hypersonic Boundary Layer. Daniel R. Bower and Ching Shi Liu, *State University of New York at Buffalo* (**32**, 12, p. 2366) Article based on AIAA Paper 93-2981

J94-355 Quality Estimates and Stretched Meshes Based on Delaunay Triangulations. Jens-Dominik Müller, *von Kármán Institute for Fluid Dynamics, Belgium* (**32**, 12, p. 2372) Article based on AIAA Paper 93-3347 CP933

J94-356 Data-Parallel Lower-Upper Relaxation Method for Reacting Flows. Graham V. Candler and Michael J. Wright, *University of Minnesota*; and Jeffrey D. McDonald, *MasPar Computer Corporation* (**32**, 12, p. 2380) Article based on AIAA Paper 94-0410

J94-357 Hypersonic Flow Past Open Cavities. Algacyr Mort-

genstern Jr. and Ndaona Chokani, *North Carolina State University* (**32**, 12, p. 2387) Article based on AIAA Paper 93-2969

J94-358 Comparison of Standard and Matrix-Free Implementations of Several Newton-Krylov Solvers. Paul R. McHugh and Dana A. Knoll, *Lockheed Idaho Technologies Company* (**32**, 12, p. 2394) Article based on AIAA Paper 93-3332 CP933

J94-359 Effect of Grid Aspect Ratio on Convergence. P. E. O. Buelow, S. Venkateswaran, and Charles L. Merkle, *Pennsylvania State University* (**32**, 12, p. 2401) Article based on AIAA Paper 93-3367 CP933

J94-360 Active Boundary-Layer Control in Diffusers. Anthony H. M. Kwong and Ann P. Dowling, *Cambridge University, England, UK* (**32**, 12, p. 2409) Article based on AIAA Paper 93-3255

J94-361 Numerical Model of Boundary-Layer Control Using Air-Jet Generated Vortices. F. S. Henry and H. H. Pearcey, *City University, England, UK* (**32**, 12, p. 2415) Article

J94-362 Eigenanalysis of Unsteady Flows About Airfoils, Cascades, and Wings. Kenneth C. Hall, *Duke University* (**32**, 12, p. 2426) Article based on AIAA Paper 94-1427

J94-363 Identification of Impact Forces at Multiple Locations on Laminated Plates. Enboa Wu and Jung-Cheng Yeh, *National Taiwan University*; and Ching-Shih Yen, *Fushin Institute of Technology, Taiwan, ROC* (**32**, 12, p. 2433) Article

J94-364 Analysis of Stress Due to Fastener Tolerance in Assembled Components. Joshua H. Gordis, *Naval Postgraduate School*; and William G. Flannelly, *Kaman Aerospace Corporation* (**32**, 12, p. 2440) Article

J94-365 Probability of Failure and Risk Assessment of Structure with Fatigue Cracks. M.-H. Herman Shen and Minsheng Shen, *Ohio State University* (**32**, 12, p. 2447) Article

J94-366 Investigation of the Free Vibration of a Rectangular Membrane. R. K. Singhal, *Canadian Space Agency*; D. J. Gorman, *University of Ottawa, Canada*; J. M. Crawford, *Dynacon Enterprises Ltd., Canada*; and W. B. Graham, *Software Systems Engineering, Canada* (**32**, 12, p. 2456) Article

J94-367 Critical Load Analysis of Undamped Nonconservative Systems Using Bieigenvalue Curves. Shyh-Rong Kuo, *National Taiwan Ocean University*; and Yeong-Bin Yang, *National Taiwan University* (**32**, 12, p. 2462) Article

J94-368 Parallel Processing for Implicit Solutions of the Navier-Stokes Equations. S. Abdallah, *University of Cincinnati* (**32**, 12, p. 2469) Technical Note

J94-369 Effects of Spatial Order of Accuracy on the Computation of Vortical Flowfields. J. A. Ekaterinaris, *Navy–NASA Joint Institute of Aeronautics* (**32**, 12, p. 2471) Technical Note based on AIAA Paper 93-3371 CP933

J94-370 Vorticity in an Inviscid Fluid at Hypersonic Speeds. David Nixon, *Queen's University of Belfast, Northern Ireland, United Kingdom* (**32**, 12, p. 2474) Technical Note

J94-371 Shock Tunnel Measurements of Hypervelocity Blunted Cone Drag. L. M. Porter, A. Paull, D. J. Mee, and J. M. Simmons, *University of Queensland, Australia* (**32**, 12, p. 2476) Technical Note

J94-372 Enhanced Mixing of Multiple Supersonic Rectangular Jets by Synchronized Screech. R. Taghavi, *University of Kansas*; and G. Raman, *NYMA, Inc.* (**32**, 12, p. 2477) Technical Note based on AIAA Paper 94-2325

J94-373 Effect of Non-Poisson Samples on Turbulence Spectra from Laser Velocimetry. Dave Sree, *Tuskegee University*; and Scott O. Kjelgaard and William L. Sellers III, *NASA Langley Research Center* (**32**, 12, p. 2480) Technical Note based on AIAA Paper 94-0041

J94-374 Static Behavior of Laminated Elastic/Piezoelectric Plates. Paul Heyliger, *Colorado State University* (**32**, 12, p. 2481) Technical Note

J94-375 Dynamic Response of Cross-Ply Shallow Shells with Levy-Type Boundary Conditions. A. A. Khdeir, *Middle East Technical University, Turkey* (**32**, 12, p. 2484) Technical Note

J94-376 Vibration of Clamped Right Triangular Thin Plates: Accurate Simplified Solutions. H. T. Saliba, *Lakehead University, Canada* (**32**, 12, p. 2486) Technical Note

J94-377 Preconditioned Domain Decomposition Scheme for Three-Dimensional Aerodynamic Sensitivity Analysis. Mohamed E. Eleshaky and Oktay Baysal, *Old Dominion University* (**32**, 12, p. 2489) Technical Note based on AIAA Paper 94-0160
